

BIRDY'S

CIVIL AND MINING

Capability Statement

2025

Company Overview

Birdy's Civil and Mining specialises in wet and dry hire of water carts, excavators, loaders and graders, offering comprehensive earthworks and dust suppression solutions to Western Australia. Since 2021, we have served civil, mining exploration and pastoral industries across the Kimberley and beyond, delivering reliable, well-maintained equipment and expert operators.

Our locally owned business prides itself on deep regional knowledge, enabling us to excel in remote, challenging environments. We provide personalised, high-quality service, with a commitment to indigenous employment and sustainable operations.

Reliable wet and dry hire solutions for mining, civil exploration and pastoral industries across WA.

Our Services

At Birdy's Civil and Mining, we specialise in remote operations, delivering efficient, high-quality results in the most challenging environments.

Wet and Dry Equipment Hire

An extensive range of water carts, excavators, graders and loaders for hire, backed by expert operators.

Water Carts:

- Hino 4x6 (15,000L)
- Isuzu 4x6 (15,000L)

Excavators:

- 15T SANY SY115U zero slew
- 21T SANY SY215C
- 23T Volvo EC220L
- 35T Volvo zero slew
- 35T Shantui SE335LC
- 2 x 36T SANY SY365H
- 2 x 50T SANY SY500H
- 70T Shantui SE700LC (23m reach)
- 75T SANY SY750H
- 125T SANY SY1250H
- 125T Shantui 1250LC

Service Trucks:

- Hino 500 6x4

14ft Shantui Graders:

- Shantui SG21-B6
- Shantui GS27-C5

Loaders:

- Shantui L56 IT
- 24T Shantui L76 wheel loader

Dozers:

- Shantui DH36M

Site Services

- Dust suppression for mining and civil sites.
- Water supply for exploration projects.
- Waste and tailings dump maintenance and construction.
- Ore sorting and metal removal to enhance crusher efficiency.
- Site clearing, exploration pad preparation and rehabilitation.
- Grading access and haul roads for safer operations.
- Rock armouring for erosion and structural stability.

Earthworks and Site Preparation

- Precise batter trimming for accurate slopes.
- Bulk earthworks for excavation and material handling.
- Rock breaking and removal for site preparation.
- Rock armouring to prevent erosion.
- Grading access and haul roads for efficient logistics.

Accreditation + Expertise

Certified professionals with Section 44 accreditation as well as specialised training and certification through Training Services Australia.

Accreditations and Certifications:

- Section 44 Appointed Person Certification.
 - Certified by Richards Mining
- Ridged and articulated haul truck operations
 - Water carting and dust suppression
 - Excavator and rock-breaking operations
 - Track dozer operations
 - Wheel loader operations
 - Bulk material handling

Case Studies

Project: Kimberley 3 Bridges project

The Problem

The Kimberley 3 Bridges project faced significant erosion damage, delaying progress in a remote and challenging environment.

Our Approach

Utilising local expertise, high-grade equipment and skilled operators we implemented effective erosion repair and ensured efficient operations in a demanding setting.

The Results

Erosion was effectively repaired on the Kimberley 3 Bridges project, with timely outcomes achieved through local expertise and reliable equipment in a remote setting.

Project: Savannah Nickle mines/Panoramic Resources

The Problem

Oversized rocks on the ROM were proving too large for crushers, leading to frequent disruptions. Additionally, removing metals mixed within the larger rocks caused further inefficiencies in the crusher circuit.

Our Approach

We provided high-quality equipment and efficient rock-breaking solutions to address the issue. We also removed metals from the oversized rocks, ensuring minimal contamination in the crusher circuit.

The Results

The issue was resolved in 4 weeks compared to the projected six months, crusher efficiency was enhanced by reducing metal contamination and downtime was minimised, boosting site productivity.
