

# NESTING PROGRAM AT THE POLYMERS CENTER

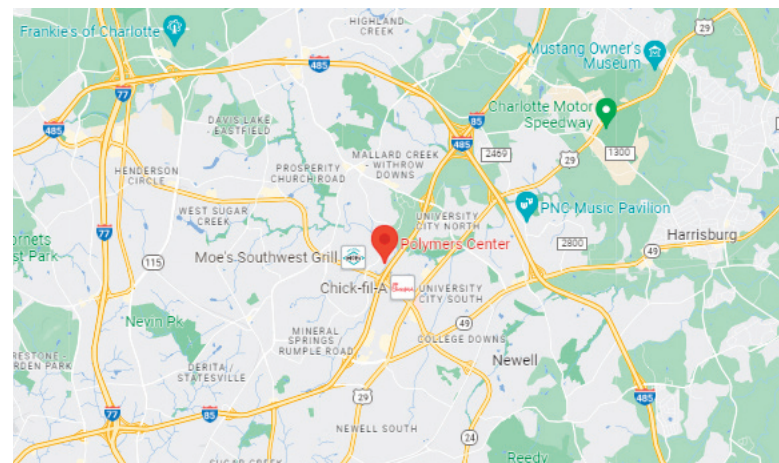

The objective of our nesting program is to provide European companies that manufacture equipment for the Polymer and Plastics industry with a convenient means of entry into the US Market.

The Polymers Center in Charlotte, North Carolina currently assists companies in the Polymer and Plastics industry with research and development, toll compounding, injection molding and material testing.

The Polymers Center is currently constructing a new addition to our existing Charlotte facility. This new addition will be 12,000 sq/ft of office space and research and development areas. In the new facility, we will have six offices available for our nesting program.

## BENEFITS OF NESTING AT THE POLYMERS CENTER INCLUDE:

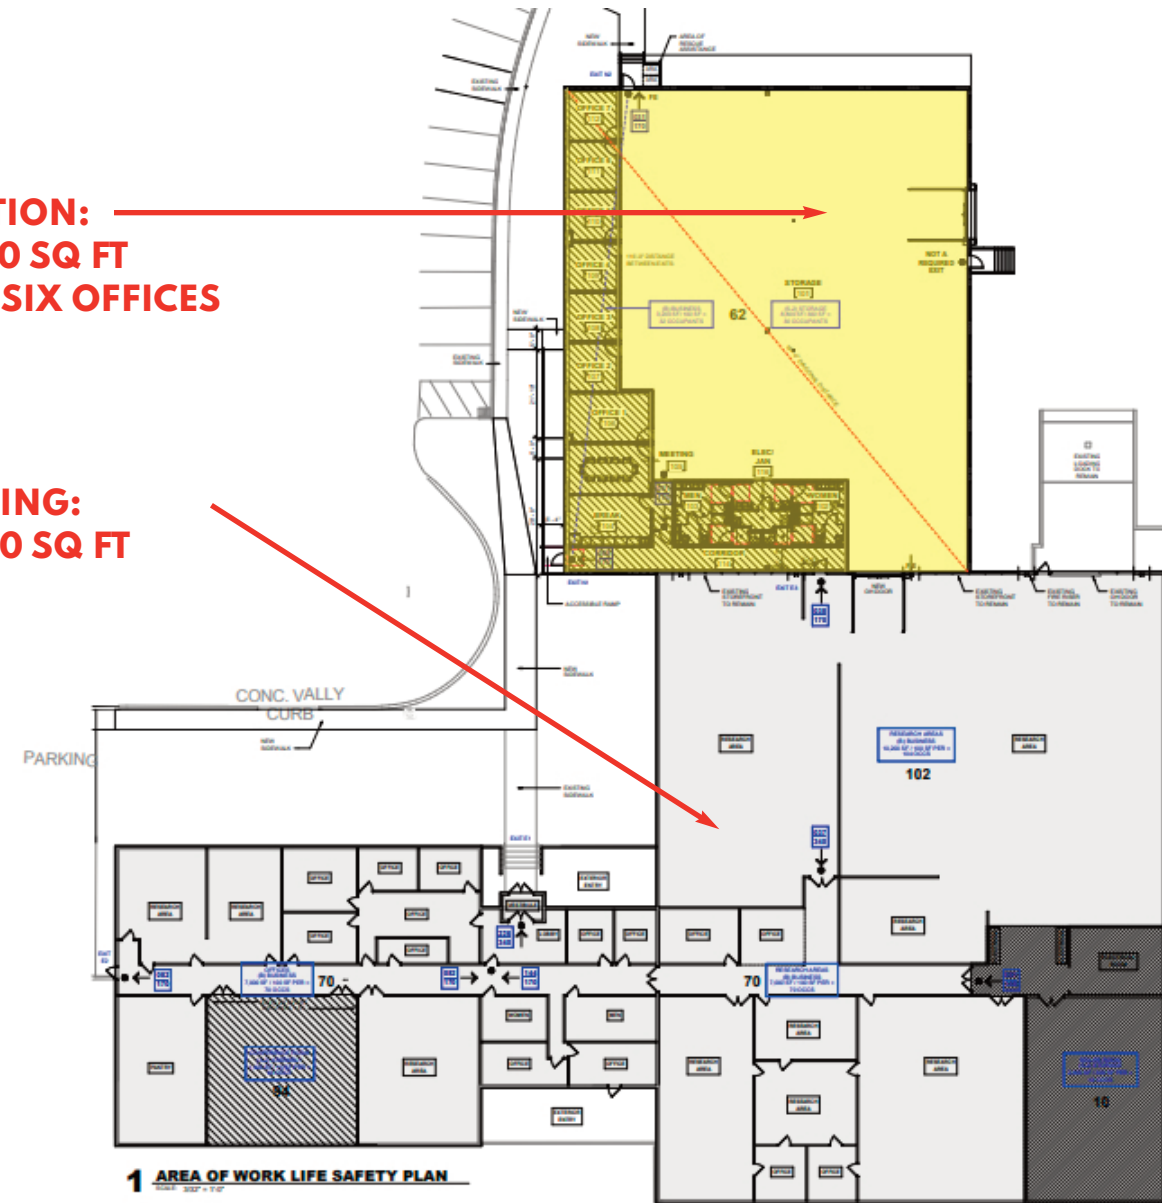

- 10 x 10 office fully furnished
- Warehouse space for inventory
- Space in our lab for your equipment to support trials
- Tenant signage on the property
- Additional support options:
  - Clerical
  - Shipping & receiving assistance
  - Lab trials
  - Marketing
  - Industry expertise and recommendations
  - Assistance with industry contacts and sales avenues to the market, with focus on potential salespeople and/or manufacturers' representatives
- 45-person conference room for customer training, meetings or presentations (fully equipped for remote access)
- The Polymers Center is a partner of EDPNC
