

ॐ Gaiea संस्कृत

The journey began with singing in a choir, and alongside writing songs, writing musical theatre comedies and doing stand up... sang jazz, sang in a band and one day started singing in Sanskrit. I had always known Sanskrit and chanted it and sounded it, but for myself alone and often only within. One day I decided to upload a video to Youtube of me looping a set of phrases in Sanskrit based on a melody my teacher in Pondicherry had taught me. Something about it caught on, the meditative aspect, the free flowing intuitive way of singing, and 'Gaiea Sanskrit' was born. Since then I have sang around the world, gone viral on Youtube and WhatsApp, recorded over 20 albums, and the songs keep coming and the chants are endless. A lifetime's work has opened up.

Biography

I realised when I was asked to sing the Madalasa song and came up with a composition, what I tuned into were the qualities of Mother in all her forms, Kali, Lakshmi, and Saraswati, Mother can be fierce and protective, she can be soft and comforting and she can be beautiful and sweet. As I sing I am Universal Mother and this is what comes through in the song, everyone, any age, any species, needs and has a Mother. And I saw that I can be that through song.

For a lot of the pop songs of this age appeal to only one part of the human psyche, the sexual and playful part, the lustful and owning part, and I see that if I can represent and be and tune into and embody and become Universal Mother when I sing then that is how I serve humanity, so when they hear me sing they are in the arms of their Mother and are there through the sound.
