First aid treatment

Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing irregular or if respiratory occurs, provide artificial respiration or oxygen trained personnel. It may be dangerous to the person providing aid to give mouth to mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Ingestion	Wash out mouth with water. Remove dentures if any.. Remove victim to fresh air and keep at rest in a position, comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Eye contact	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Skin contact	Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before re use.
Storage, handling, spillage and disposal	
Do not store above the following temperature 50C. Store in accordance with local regulations. Store away from direct sunlight in a dry cool and well ventilated area, away from incompatible materials and food and drink. Eliminate all ignition sources. Use appropriate containment to avoid environmental contamination.	

Fire precautions and action
Use an extinguishing agent suitable for surrounding fire

Maintenance of plant, equipment or PPE
Personal protective clothing should be considered based on the task being performed and the risk involved. Gloves and apron to be worn when using this product.

Health surveillance ☐	

First aid treatment	
Inhalation	This product is not classified as hazardous through inhalation, however, it is recommended in case of intoxication symptoms to remove the person affected from the area of exposure, provide clean air and keep at rest. Request medical attention if symptoms persist.
Ingestion	Do not induce vomiting, but if does happen keep the head down to avoid aspiration. Keep the person affected at rest. Rinse out the mouth and throat, as they may have been affected during ingestion.
Eye contact	Rinse out thoroughly with lukewarm water for at least 15 minutes. Do not allow the person affected to rub or close their eyes. If the injured person uses contact lenses, these should be removed unless they are stuck to the eyes, as this could cause further damage. In all cases, after cleaning, a doctor should be consulted as quickly as possible with the SDS of the product.
Skin contact	This product is not classed as hazardous when in contact with the skin. However, in case of skin contact it is recommended to remove contaminated clothes and shoes, rinse the skin or shower the person affected if necessary thoroughly with cold water and neutral soap. In case of serious reaction consult a doctor.

Storage, handling, spillage and disposal
Store in a cool, dry, well-ventilated location. Avoid sources of heat, radiation, static electricity and contact with food.

Fire precautions and action
This product is non-flammable.

Maintenance of plant, equipment or PPE
Ensure gloves are worn when using this product.
