Home Loans

FHA Mortgage

Insured by the Federal Housing Administration, borrowers must pay mortgage insurance premiums, which protects the lender if a borrower defaults

Eligible Property Types:

- Primary residence
- Single family homes
- Condominiums
- Manufactured homes
- Modular homes
- Rural properties

Benefits:

- As little as 3.5% down
- Credit scores as low as 580
- Fixed Mortgage Insurance regardless of credit score
- Allows higher debt to income percentage, which allows for a higher purchase price.
- Down Payment Assistance Programs available

FHA Property Guidelines

- No cracked windows
- No missing flooring/no sub-floor showing
- No missing shingles
- AC/Heat must be in working condition
- Plumbing works in all sinks, toilets, showers
- Smoke and carbon monoxide detectors
- GFCI outlets in bathroom and kitchen
- Outlet covers on all outlets
- Up to date well/septic
- Handrails on all stairs
- No peeling paint (before 1978)

- Plumbing works in all sinks, toilets, shower
- producing income (barns, silos, commercial greenhouses)
- Smoke and carbon monoxide detectors
- GFCI outlets in bathroom and kitchen
- No pool
- Outlet covers on all outlets
- Access to the home on an all-weather or
- Up to date well/septic paved road

Property must be located in eligible rural area as defined by USDA

Additional Property Testing

Well Water - Sample must be taken by a disinterested third party and must be performed by the local authority or by a laboratory acceptable to the local health authority or EPA.

Conventional

- Existing properties (occupied or vacant) - No well water inspection is required unless appraiser has indicated in the report that a water test is required or there is evidence to suggest to the underwriter that the property needs a water test to meet agency or investor guidelines.
- New construction or constructed within 1 year and never occupied - well water test required to verify that the subjects water supply is potable and meets local health authority (or EPA) requirements.

FHA

- Existing properties (occupied or vacant) - No well water inspection is required unless appraiser has indicated in the report that a water test is required or there is evidence to suggest to the underwriter that the property needs water test to meet agency or investor guides.
- New construction or constructed within 1 year and never occupied- well water test required to verify that the subjects water supply is potable and meets local health authority (or EPA) requirements.

USDA/VA

- If the subject property has a private water system, a water test will be required for all loans regardless if the subject property is vacant or occupied at the time of the appraisal or when it was constructed.

Septic Inspections - Must be completed by a licensed professional.

Conventional

- Existing properties (occupied or vacant) - No septic system inspection is required unless appraiser has indicated affluence or there is evidence in the appraisal that suggests failure, issues with the system or required per agency or investor guidelines.
- New construction or constructed within 1 year and has never been occupied - Satisfactory septic inspection required.

FHA

- Existing properties (occupied or vacant) - No septic system inspection is required unless appraiser has indicated affluence or there is evidence in the appraisal that suggests failure, issues with the system or required per agency or investor guidelines.
- New construction or constructed within 1 year and never occupied- satisfactory septic inspection required.

VA/USDA

- Existing properties (occupied or vacant) - No septic system inspection is required unless appraiser has indicated affluence or there is evidence in the appraisal that suggests failure, issues with the system or required per agency or investor guidelines *Note: If the USDA has a condition on their commitment, then a septic would be required regardless.
- New construction or constructed within 1 year and never occupied- Satisfactory septic inspection required.

If the sales contract references that a water test or septic inspection will be performed or has been completed, a copy of that report is required for the file regardless of the loan type or occupancy at the time of the appraisal.

Contaminant Testing

Conventional

- Coliform/E. coli
- Nitrates

VA

- Nitrates
- Nitrite
- Lead
- Coliform/E. coli
- Bacterium
- Arsenic

FHA & USDA

- Total coliform (includes fecal coliform and E. coli)
- Nitrates, total
- Nitrites
- Lead
