How to Measure a Dog Collar

- Using your dog's current collar:
 - Measure (in inches) from the end of material at the buckle end to the hole the collar is currently using.
- Using a sewing tape:
 - Take a sewing tape and measure (in inches) your dog's neck where the collar would normally sit/rest.
- Don't have a sewing tape?
 - Take a piece of string/yarn, measure your dog's neck where the collar would normally sit/rest, mark the cut off, measure the string/yarn with a measuring tape (in inches).
- Notes:
 - When measuring your dog's neck, make sure the sewing tape is snug, but not too tight.
 - General guideline is that you should be able to comfortably fit two fingers between the measuring tape and the dog's neck.
 - Please use inches for consistency.
 - Measure at the current collar hole, which will allow us to place holes for you to size the collar up or down.

Dog Collar Sizing Guide
