

Emma Clark, CCFT

Regional Consultant, Forest Technician

- *A.A.S. in Wildlife Resources Management, Hocking College*
- **Society of American Foresters, Candidate Certified Forestry Technician**

Emma Clark, a Society of American Foresters (SAF) Candidate Certified Forest Technician (CCFT), is our Regional Consultant for the Ohio and Pennsylvania region. Emma has over three years of experience. She has provided technical services, including recommendations for sustainable forest management practices, to more than 200 large and small landowners of forest and mixed-use properties throughout rural and Appalachian Ohio, Pennsylvania, Tennessee, and West Virginia.

A graduate of Hocking College's Wildlife Resources Program, Ms. Clark integrates her comprehensive background in Appalachian ecology with silvicultural management of forest communities. Her expertise includes a functional understanding of forest, grassland, aquatic, and mixed-use/agricultural land uses and their simultaneous, reciprocal relationships with birds, mammals, reptiles, amphibians, fish, and macroinvertebrates across all trophic levels.

As a Regional Consultant, Ms. Clark's knowledge in forestland stewardship spans a wide range of aspects. She has extensive experience formulating forest management plans for state, federal, and non-profit applications, as well as independently overseeing all stages of contracted timber sales and forest improvement practices. Ms. Clark has also executed several phases of IFM carbon credit projects, including permanent plot establishment, inventory, verification, and data collection analysis. She provides standby remote and field support for any and all client-property needs on an individualized basis. Her geospatial and remote analysis toolkit includes advanced competency in ESRI ArcGIS, where she routinely creates high-quality cartographic deliverables from varying data models.
