

Rachel Brock, CCF

Associate Consultant, Forest Technician

- **B.S. in Forestry**, *University of Tennessee, Knoxville*
- **Society of American Foresters**, *Candidate Certified Forester Technician*

In my role, I develop and write forest management plans that incorporate landowner obj

Rachel Brock, A Society of American Foresters (SAF) Candidate Certified Forester (CCF), is our Regional Consultant for the Eastern Kentucky, West Virginia, and Southern Ohio regions.

Mrs. Brock specializes in applying an interdisciplinary approach to sustainable land management, seamlessly integrating forest ecology, watershed dynamics, wildlife habitat, and silviculture to meet complex landowner objectives.

Passionate about community-driven stewardship, she actively bridges the gap between government agencies and private landowners in rural, underserved communities by providing accessible forestry knowledge and technical land-management assistance.

A 2024 Valedictorian graduate of the Herbert College of Agriculture at the University of Tennessee, Knoxville (B.S. in Forestry, Restoration & Conservation Science), and a Society of American Foresters Candidate Certified Forester, she integrates her academic foundation and hands-on experience spanning private consulting and federal land management. Her extensive field operations include conducting timber cruises to produce precise volume and value estimates, timber marking, and supervising large-scale reforestation plantings on degraded agricultural lands. Additionally, she serves as an independent validator for forest carbon auditing and utilizes GIS to create comprehensive project maps.

Mrs. Brock enjoys working closely with landowners to ensure that their management strategies are resilient, ecologically sound, and aligned with their future management goals.
