## PROFESSIONAL PROFILE

Professional in natural resources management and Candidate Certified Forest Technician with an emphasis on wildlife ecology in symbiosis with forest stewardship. Technical implementation and direct client consultation of forest carbon strategy, timber sales, and comprehensive forest management plans to establish cross-ecosystem vitality across several states and various ecoregions.

## CORE COMPETENCIES

- **Forest Carbon Credits:** Technical IFM project execution and verification. This includes client consultation, permanent plot establishment and inventory, permanent plot verification, temporary plot inventory, and data collection analysis.
- **Forest Management Plans:** Formulation of silvicultural recommendation forest management plans utilizing plot inventory analysis and observational field data within state tax benefit programs, EQIP, Family Forest Carbon Program, timber sale, and niche wildlife management applications.
- **Geospatial & Remote Analysis:** Advanced competency in ESRI ArcGIS, including creation of internal/ external-use cartographic products and diverse spatial modeling of field datasets.
- **Individualized Property Services:** Providing standby remote and field consultation for specific client-property needs, relating to utility providers, forest management contractors, absentee landowner oversight, and wildlife monitoring.
- **Timber Sales:** Independent management of all timber sale aspects, regarding client consultation, contractor coordination, timber marking and inventory analysis, silvicultural treatment assignments, and bid document preparation/ advertisement.

## EDUCATION

- **A.A.S. in Wildlife Resources Management,**  
December 2023, Hocking College

## CERTIFICATIONS/ LICENSURE

- **Society of American Foresters, Candidate Certified Forest Technician**
  - Transition to full *Certified Forest Technician* expected October, 2026

## WORK EXPERIENCE

- **Heritage Habitat & Forestry, LLC**  
Centerburg, OH; October 2023 – Present
  - Regional Consultant/ Forest Technician
    - As Regional Consultant, I have provided technical service with recommendation of sustainable forest management practices to more than 200 large and small forest/ mixed land-use property landowners throughout rural and Appalachian Ohio, West Virginia, Tennessee, and Pennsylvania. These initiatives are built upon timber inventory data cohering with scientifically-sound forest community stewardship principles, which synthesize long-term ecosystem vitality.
