

Our ThickGlass™ and TRUE Colors™ collections redefine what's possible with glass surfaces. These high-end cast glass products offer exceptional thickness, durability, and a striking visual impact that sets them apart from anything else on the market.

ThickGlass delivers a bold, sculptural presence—each piece is hand-crafted to showcase depth, clarity, and texture that will captivate even the most discerning eye.

TRUE Colors glass by TCG Glass isn't just another decorative glass product—it's the real deal. Unlike back-painted or laminated options that can peel, fade, or discolor over time, TRUE Colors glass is made from solid, genuine colored glass. That means rich, permanent color that won't scratch off, wear down, or lose vibrancy.
