

CAST GLASS

Cast Glass

Cast glass can be utilized in many applications: counter tops, interior panels, bar tops, waterfalls, privacy panels, logo panels, and more. We can even customize our cast glass to match the design in a piece of fabric, wallpaper, or even a rough sketch. Cast glass requires little maintenance and provides a level of privacy while allowing an abundance of light to pass through the glass. We offer the largest number of standard textures in the industry and unlike competitors, we produce a new mold for EACH piece of glass which allows us to more easily customize our glass textures for your project at little to no cost up-charge. Our cast glass panels can be tempered, laminated, or bent and tempered to meet codes for safety glass.
