

DICHROIC GLASS CREATES DYNAMIC, EVER-CHANGING COLOR EFFECTS, ADDING DEPTH, INTRIGUE, AND SOPHISTICATION. IT'S PERFECT FOR CREATING EYE-CATCHING FEATURES IN BOTH COMMERCIAL AND RESIDENTIAL SPACES.

DICHROIC GLASS

Bring your design to life with TCG Glass's dichroic glass. Known for its vibrant color changes, it creates an unparalleled visual experience. This high-impact material enhances contemporary spaces, adding depth and intrigue to any architectural feature or artwork. Explore the endless possibilities of dichroic glass with TCG. Dichroic glass is a unique material that appears to change color depending on the angle of light. This effect occurs due to its special coating, which reflects and transmits different wavelengths of light.

TCG GLASS

PRODUCT DESCRIPTION

Composition

Dichroic glass is either a laminated or tempered glass product depending on the option selected. Both options meet all safety requirements.

Basic Uses

Available in vertical, horizontal, and glass flooring panels. Recommended for interior, as well as some limited exterior applications and whenever a visually dynamic, full spectrum color shifting appearance is a desirable part of the design concept, whether backlighting or using for opaque surfacing.

SIZE AVAILABILITY AND COLOR

Laminated

Available in sizes up to 144" x 96".

The majority of our orders we provide cut to size fyi to receive cost of glass, crating and freight.

Colors

We currently offer 3 standard transparent colors can be seen on the right. These can be laminated with etched glass, textured glass, or mirrors for custom products. We also offer our Peacock Mirror products which are dichroic mirror products!
