TSCA Compliance Statement

Introduction:

Olympic Steel supplies flat-rolled metal plate, sheet, coil and blank products to a variety of industries. The types of materials supplied include carbon, alloy, aluminum and stainless steels. The metal compositions supplied are well-known materials as specified by ASTM International, the American Iron and Steel Institute (AISI) and the United States Military (MIL-specs). Products are supplied accompanied by a certificate which gives element concentrations within the product and the results of any required physical or metallurgical tests as specified on the material specification. The provision of such information has become standardized throughout the metals industry and until recently has been sufficient to satisfy the needs of our clients.

TSCA Compliance

To the best of our knowledge, Olympic Steel Inc complies with the applicable rules or orders under the U.S. Toxic Substances Control Act (TSCA) Section 8 (08/14/2025) and confirm that our products do not contain any restricted substances and are not subject to TSCA.

Respectfully

Coady Barrie
Corporate Quality Manager.
