

Over 1 million people have been poisoned and killed by Carbon Monoxide (CO).

The CO/PRO automatically shuts off appliances when CO is detected.

CARBON MONOXIDE IS AN INVISIBLE AND ODORLESS GAS THAT KILLS AND POISONS THOUSANDS OF PEOPLE EVERY YEAR.

STOP CARBON MONOXIDE AT THE SOURCE WITH **CO/PRO®**

Fuel burning appliances like furnaces and water heaters create carbon monoxide (CO), a deadly invisible and odorless gas.

If these appliances fail, they can fill your home with (CO). You may not know it until hours after it has reached a (CO) detector, which could be too late for some people.

The CO/PRO attaches to fuel burning appliances and shuts them off when (CO) gas is detected... to stop it from spreading in your home.

**DETECTORS
DETECT.**

**PROTECTORS
PROTECT.**

WHEN IT COMES TO (CO), DON'T JUST DETECT... PROTECT!®
