# SPARK-IN®

The French manufacturer of micro-machines

## A FAMILY STORY !

Charles et Jean-Marie FLIX - 1982 - Intermat TP exhibition

### ENGINEERS FROM FATHER TO SON – THE FLIX FAMILY HAS BEEN INNOVATING SINCE 1972!

That year, Jean-Marie FLIX obtained his engineering degree and, together with his wife Josette, founded a company specialising in the design and manufacture of industrial machines. In 1992, the family established the company in Saint-Germain (10120), firmly anchoring its local roots.

They passed on to their son a dual passion: innovation and the defence of the values of French manufacturing. For them, producing in France also means creating jobs and contributing to the economic and social vitality of our country.

2012, micro-excavator SXR 1<sup>st</sup> génération

2025, JM & C FLIX, design office

### INNOVATION AT THE SERVICE OF THE FIELD

After obtaining his engineering degree in 2001, Charles very quickly filed his first patents, designs and trademarks, and founded SPARK-IN in 2005 in Saint-Germain. In 2012, he designed his first simple yet reliable micro-excavator. Four years later, the microBull® was born, the most compact tool carrier in the world, capable of passing anywhere with its 75 cm width. This innovation revolutionised work sites with difficult access.

Faced with growing demand, SPARK-IN® now develops a complete range of microBull® and micro-excavator machines, adapted to many different trades. The diversification of our machines and international development led us to adopt the company name SPARK-IN® as our main brand, gradually withdrawing our former commercial name “micro-pelle®”, under which many customers knew us.

The team has grown over the years and now includes many employees, while maintaining a family spirit.

2015, microBull lifting height 130 cm

Josette FLIX, accounting

### OUR COMMITMENT: TO SATISFY YOU WITH QUALITY AND PROXIMITY-BASED WORK

With more than 200 distributors, SPARK-IN ensures proximity, quality and exemplary after-sales service.

Choosing SPARK-IN means choosing a French, family-owned and innovative company, committed to supporting you.

Discover all the manufacturing stages of our machines, entirely produced in France. From design to assembly, from steel processing (laser cutting, bending, machining, welding, ...) to maintenance and machine follow-up, we have chosen to integrate production as much as possible in order to better satisfy you.

2016, microBull lifting height 200 cm

# General Terms and Conditions of Sale

**SPARK-IN®**  
The French manufacturer of micro-machines

micro-pelle.fr is the trade name of SPARK-IN SAS, with share capital of EUR 37,500, whose registered office is located at 7, rue Paul Cézanne, 10120 SAINT GERMAIN - France. Registered with the Trade and Companies Register of TROYES under number 487512824 RCS TROYES. The site is the property of SPARK-IN in its entirety, together with all related rights. Any reproduction, in whole or in part, is prohibited without the prior written authorisation of SPARK-IN.

## Article 1 - APPLICATION OF THE CONDITIONS

The seller is defined below as SPARK-IN. The buyer is defined below as the person signing and accepting these conditions of sale. The general terms and conditions of sale apply exclusively to all sales concluded by SPARK-IN®. Any other conditions shall bind the seller only after written confirmation from it. The information given in catalogues, price lists, on the website, in notes, etc. is given for information purposes only and may, as such, be modified by the seller without notice. The characteristics of the products presented on the site may change. The photos, graphics, texts and information attributed to each model are non-contractual. Accordingly, SPARK-IN® may not be held liable in the event of error or omission in the presentation or in the event of modification of a product's characteristics by the supplier. The mere fact of placing an order or accepting an offer from the seller constitutes unreserved acceptance of these general conditions. The general conditions may be modified at any time and without notice by SPARK-IN®, and such modifications will then apply to all subsequent orders. The geographical area covered by the SPARK-IN offer is Europe.

## Article 2 - PRICES

The prices shown on the site are expressed in Euros, excluding taxes and excluding delivery charges. The total price indicated in the order confirmation is the final price expressed in Euros, all taxes included. It includes the price of the items, packaging costs and transport costs. The total price of the order is payable in cash, in Euros only, on the day of confirmation of the order. SPARK-IN reserves the right to modify the prices of the items shown on the site at any time, without prior notice.

## Article 3 - ORDERS

To place an order, the buyer must first identify himself or herself. To do this, he or she must complete, in accordance with the instructions provided online, a form made available to him or her in which he or she will enter the information necessary for identification, including surname, first name, telephone number, postal address, email address, billing address and delivery address. Additional information may subsequently be requested in order to ensure the quality and safety of delivery. Orders become effective on the date of receipt of payment for cheques or bank transfers and on the date on which the buyer's account is debited for bank cards.

## Article 4 - PAYMENT

Payments must be made in such a way that the seller can dispose of the sums on the due date. Payments may be made by bank transfer, by card or by cheque when ordering. The cheque is cashed on receipt. No cash-on-delivery shipment will be made. Any payment made to SPARK-IN® may not be considered as a deposit. The buyer may never, on the grounds of a claim made by him or her, withhold all or part of the sums due by him or her, nor set off any amount. When the buyer is late in making total or partial payment of an instalment when due, the seller may, by that fact alone and without prior formal notice being necessary, immediately suspend deliveries, without the buyer being entitled to claim damages from the seller. In the event of legal proceedings, the seller is entitled to claim reimbursement from the buyer of costs of every kind connected with the action. For any payment made on the website, the seller reserves the right, in order to accept the sale, to ask the buyer to prove identity and place of residence.

Payment by bank cheque upon ordering: the cheque must be sent, dated, signed and made payable to SPARK-IN at the following address (please specify):

SPARK-IN - Order Department  
7, rue Paul Cézanne  
10120 Saint Germain

The buyer must also state on the back of the cheque the related order number. After the order has been recorded, the buyer has 10 days, including delivery time, to send us the payment cheque. After this period, the order will automatically be cancelled.

NB: Cheques are cashed on receipt. A banker's cheque may be requested if the amounts involved exceed EUR 800. SPARK-IN® accepts only cheques made out in Euros and drawn on a bank whose branch is located exclusively within French territory. Payment by bank transfer upon ordering. For this, please contact us to obtain our SEPA details. The buyer must also state the related order number in the transfer order. After the order has been recorded, the buyer has 10 days to make the transfer. After this period, the order will automatically be cancelled.

## Article 5 - DELIVERY

Delivery times are always given for information purposes only, including on quotations. Consequently, exceeding delivery times may in no event give rise to the payment of damages, withholdings or cancellation of current orders. By express agreement, a case of force majeure or events such as lock-out, strike, total or partial stoppage of work in the seller's factory or at its suppliers, epidemic, war, requisition, fire, flood, interruption or delay in transport, legal or administrative measures preventing, restricting, delaying or prohibiting the manufacture or importation of the goods, releases the seller from all liability for delivery. SPARK-IN® will keep the buyer informed, in due course, of the cases and events listed above. In all cases, timely delivery can take place only if the buyer is up to date with his or her obligations towards SPARK-IN®. Delivery of equipment never includes commissioning or operating explanations. Delivery is made to the address indicated by the customer during the ordering process. In the absence of any recipient at the delivery address indicated when ordering, a notice of attempted delivery will be left in the letterbox and any re-delivery charges will be borne by the buyer. SPARK-IN® does not deliver to hotels, campsites, military bases or post office boxes and reserves the right to refuse any order whose delivery address is not compliant. Delivery charges are calculated according to the delivery address indicated when ordering and according to the total amount of the order and are expressed inclusive of all taxes. Delivery is free from an amount of EUR 15,000 excluding tax for mainland France only and unless otherwise indicated on the site. For reasons of availability, an order may be shipped in several instalments.

## Article 6 - TRANSPORT

When deliveries are made by means of a carrier, the goods travel at the buyer's risk, whatever the methods and conditions of dispatch. The buyer must, obligatorily, inspect the goods upon receipt in the presence of the carrier and must, imperatively, state in writing on the transport slip, if necessary, any reservations observed, even in the case of carriage paid dispatch. Unless otherwise agreed, the seller freely chooses the carrier. If the equipment is damaged, the buyer must refuse it. In the event of loss of a parcel during transport, investigation times may vary according to the carrier and may take from one week to two months. If reservations are made upon receipt, they must be declared by registered letter to the carrier within a maximum period of 48 hours and a copy must be sent within the same period to SPARK-IN® - Order Department - 7, rue Paul Cézanne, 10120 Saint Germain.

## Article 7 - RIGHT OF WITHDRAWAL RESERVED FOR PRIVATE INDIVIDUALS

Under the conditions provided for by Article L.121-16 of the Consumer Code, in the context of distance selling and in accordance with the Hamon law, the buyer has a withdrawal period of 14 clear days from delivery of the order. To exercise this right, the buyer must return the goods at his or her own expense, risk and peril in their original condition and packaging and enclose the invoice. Failing this, the returned parcel will be refused. In the context of the right of withdrawal reserved for private individuals, SPARK-IN® will reimburse the buyer by cheque within 30 days from the date of receipt of the returned items. If a returned item proves to be incomplete or damaged, a reduction in its price will be applied according to the diagnosis carried out by the SPARK-IN® after-sales service. The buyer will then be informed of the amount of this reduction by post.

## Article 8 - CLAIMS

Any return of goods requires the prior agreement of SPARK-IN® and the obtaining of a return number. Claims relating to a defect in the delivered goods, an inaccuracy in the quantities or an incorrect reference in relation to the accepted offer or the seller's order confirmation must be made to SPARK-IN® by registered letter within 48 hours of receipt of the goods, without neglecting, if necessary and in accordance with Article 6, recourse against the carrier, failing which the buyer's right to claim will lapse. The buyer's precise contact details, the designation of the item or items concerned, their serial number or numbers and the number of the invoice or delivery note corresponding to the parts described must appear in the registered letter. The seller will send the buyer, by whatever means it deems most appropriate, a return authorisation together with a return number. After obtaining the return number, the buyer has 7 days to dispatch the item or items concerned complete and in their original packaging in perfect condition. The return of the goods shall be made at the seller's expense within one month after the order date. This return will be reimbursed by cheque by the seller on the basis of the tariff for a return by prepaid Coliposte parcel of La Poste. After this one-month period, return costs will be borne by the buyer. The buyer must enclose with the shipment a photocopy of the invoice and show on the parcel or parcels the words "AFTER-SALES SERVICE" together with the return number communicated by the seller. Failing this, the returned parcel will be refused. In the absence of agreement, any goods returned will be held at the buyer's disposal at the buyer's expense, risk and peril, with all transport, storage and handling costs being borne by the buyer.

## Article 9 - WARRANTY

All products supplied by SPARK-IN® benefit from the legal warranty provided for by Articles 1641 et seq. of the Civil Code. Our products are guaranteed for 1 year for parts and labour. For parts, you must contact us beforehand and, if we agree, return them to us (unless we instruct otherwise) at your expense. If our checks confirm the malfunction, we will replace the part. For labour, the customer must also contact us beforehand. Unless otherwise authorised by us, warranty work is carried out in our workshops located in Saint Germain (10). Transport (there and back) is borne by the buyer. In all cases, all claims, requests for exchange or reimbursement must be made with our prior agreement. The seller cannot be held liable under the warranty for breakdowns or damage resulting directly or indirectly from the following cases: any unprotected or prolonged storage; any negligence, handling error, maintenance and use of equipment not in accordance with the technical specifications of the seller or manufacturer or, more generally, defective or clumsy use; any addition of any supplementary device or accessory to the equipment or use of any parts necessary for operation of the equipment not conforming to the technical specifications of the seller or manufacturer; any mechanical, electronic, electrical, hydraulic or other modifications or alterations made to the equipment or to its connection devices by any third party. In the event of bankruptcy of, or impossibility of supply by, the manufacturer, the buyer may not turn against the seller. SPARK-IN® may not be held liable for any indirect damage that may arise from the purchase of the items. SPARK-IN® guarantees the buyer, in respect of hidden defects that may affect the delivered products, only by replacing defective items or parts rendering them unfit for their use, without the buyer being able to consider the seller responsible for any damaging consequences that such hidden defects may have caused. Return shipping costs remain the sole responsibility of the buyer. Machines designed and manufactured by SPARK-IN® are guaranteed in the context of private use, whether personal or professional. Any rental activity, whether commercial or free of charge, with or without driver, whose main purpose is the making available of equipment manufactured by SPARK-IN®, immediately cancels the warranty on such equipment.

## Article 10 - USE OF THE EQUIPMENT

The customer undertakes to use the equipment in accordance with the regulations in force and in accordance with the manual supplied with the equipment. The customer will use the equipment only after having fully read the manual, which he or she undertakes to observe scrupulously. Compliance with safety rules, among others, is imperative. In the event of insufficient technical knowledge, the customer undertakes to follow the training given by a competent professional insured for this type of work. The equipment may be subject to improvements or to specific standards. The customer undertakes to keep informed of these standards and to modify the equipment accordingly.

## Article 11 - DATA SHEET

All information contained in the data sheets (advice, practical, technical information, etc.) present on the SPARK-IN® site expresses experience that complements the other sources of knowledge available to the internet user. The decisions taken by the internet user will be those adapted to his or her own case and therefore may not engage the responsibility of SPARK-IN®. Reproduction, even partial, of the data sheets or of any other editorial content is prohibited without the prior authorisation of SPARK-IN.

## Article 12 - SAFETY

The buyer undertakes to use the equipment in accordance with the manufacturer's instructions. The customer will use the equipment only after having fully read the user manual, which he or she undertakes to observe scrupulously, and after having followed the necessary safety and driving training. He or she will also ensure that he or she is duly authorised to drive machinery, particularly in the case of professional use.

## Article 13 - RETENTION OF TITLE

In application of the law of 12 May 1980, ownership of the goods delivered to the buyer shall not be transferred until full payment of the principal price and accessories and any other instruments issued for payment of the price. During the period from delivery to transfer of ownership, the risks of loss, theft or destruction shall be borne by the buyer. The buyer's failure to fulfil payment obligations entitles the seller to demand the immediate return of the goods delivered, at the buyer's expense, risk and peril.

## Article 14 - TERMINATION CLAUSE

If the buyer fails to comply with one of his or her obligations, the sale shall be cancelled as of right and the goods shall be returned to the seller if it so wishes, without prejudice to any damages that the seller may claim against the buyer, within 48 hours after a formal notice that has remained without effect. In this case, SPARK-IN® is authorised to claim from the buyer a fixed indemnity of 30% of the amount of the sale.

## Article 15 - JURISDICTION CLAUSE

Any disputes relating to the formation, performance and termination of the contractual obligations between the parties that cannot be settled amicably shall be submitted to the jurisdiction of the Commercial Court of TROYES in whose district the seller's registered office is located, whatever the conditions of sale and the accepted method of payment, even in the event of third-party proceedings or multiple defendants, the seller reserving the right to bring the matter before the territorially competent court in whose district the buyer's registered office is located. This contract is governed by French law. The application of the Vienna Convention on the international sale of goods is expressly excluded.
