Excavator saw video

Excavator saw

Clever design and flexibility

Separate concrete, steel, wood, rock and brick reliably and in a controlled manner with vertical, horizontal or diagonal cuts.

Type	-	CMS BS08
Excavator class	t	8 - 16
Weight	kg	650
Operating pressure	bar	max. 350

Volume flow	l/min	70 - 120
Setting	-	shear*
Standard cutting depth	mm	500
Water connection	l/min	15 - 20 (max. 8 bar)

*Shear = double-acting circuit / S

Maximum cutting depth 800 mm on request

Cutting force adapted to material

Horizontal, vertical and diagonal cuts

Overload protection for saw blade

Floor, wall and ceiling flush cuts

Variable rotationspeed

Optimum water cooling of the saw blade from the centre, on both sides

Speed monitoring

Angle display in two axes

Automatic speed regulation
