CIVIL PRODUCTS

Harrybilt Engineering manufacture a range of Civil Products and Work Tools that can be built to customer requirements.

If there is something specific desired, the team are able to modify existing products with their in-house Engineers.

FORK ATTACHMENTS

Safe and efficient handling of pallets with the option of a grab for around 8t -17t Excavators. Lightweight Forks are also available that suit 5-8t Excavators. Other types for Fork Grabs include the Soft Jaw Fork Grab and Adjustable Fork Grab allowing to pick up multiple size pallets.

PIPE LIFTER

A safe, easy, fast handling and installation. Operator doesn't need to be in trench and no hydraulics are required. Pipes can be tilted and maneuvered safely to avoid obstruction.

RAKE/BLADE

Has a twin position hitch so that the operator is able to pick up the attachment for raking or cleaning up with the blade.

4in1 BUCKET

Supports any maintenance activities or general civil work. Can be built with a heavy duty bolt on edge to last longer in harsh working conditions.

TILTROTATORS

45 degrees of tilt and full rotation. Options to suit all Excavator sizes up to 33t with technical, and spare part support available.

Tiltrotator Installation is also an option the team provide.

GRADER BLADE

Ideal for cleaning up ballast from the shoulder and ballast realignment whilst moving, making a job much quicker and more efficient.

RIPPER

For Excavator pick-up, strong durable design to break up hard surfaces. Comes with replaceable tooth.

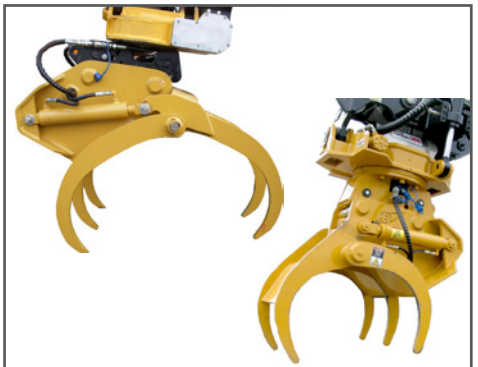

FORK LIFTING JIB

Fork Lift mounted and includes 2t Swivel Hook. Boom angle designed to allow for increased height accessibility and flexibility of use.

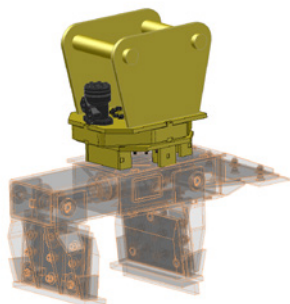

LIFTING JIB

This product has been made to offset hook loads from the hitch by about 1.5m. With a Lifting Capacity rating of 2500kg.

YABBY GRABS

Designed to be used with a Tilt Rotator to maximise its versatility over a wide range of operations. Reduces the need for manual handling inputs.

ATTACHMENT ROTATOR

Sized for excavators up to 8t. Designed to be incorporated into attachments where weight saving is of importance. Saves between 145-220kg in weight.

BULLANT

Multi-purpose grab used to lift and maneuver a range of objects including steel, concrete or timber objects. 480mm opening jaw depth.

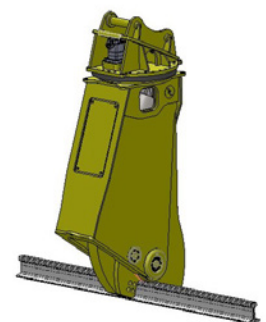

MINI POLE GRAB

Suits 7t-12t Machines. Has been designed to safely and efficiently pick up, lift and handle round loads or beams.

VARIOUS BUCKETS

Harrybilt Engineering's range of buckets include Cribbing Buckets, Trench Buckets and Mud Buckets. Sizes from 200mm to 1800mm wide. Special Purpose Buckets also available upon request.

RAIL GATOR – RAIL BREAKER
