Platypus Standard

Platypus with Clip Pusher

At Harrybilt Engineering we are endeavour to provide our customers with as much information as possible so you can achieve optimal usage of your equipment. We understand how critical downtime is and recognize the importance of preventative maintenance to minimize breakdowns.

The **Critical spares** are identified as being components that, if a failure occurs, it renders the machine or attachment unusable.

The **Preventive maintenance spares** are identified as components that, over time, during normal use, will wear and can be monitored and changed out as part of a regular maintenance schedule.
