

WASTEWATER TREATMENT SYSTEMS

MCG are committed to giving their customers the best solution & value for their money by providing a GREEN SOLUTION FOR WASTE WATER

WHY A WASTEWATER TREATMENT SYSTEM?

Groundwater is a precious resource that eventually arrives at rivers and lakes, where it can result in nutrient contamination.

It only takes 15 households using old-style septic tanks in a square kilometre to contaminate groundwater.

An effective Wastewater treatment system turns effluent into clean water and will prevent groundwater pollution. Your chance to save your world.

AIROGREEN Aerated Wastewater Treatment System

CODE	LITRES	WEIGHT KGS	EX-YARD PRICE EXCL GST
AIR	8,505	7,000	\$18,258.69

INCLUDES SUPPLY AND INSTALLATION OF THE FIELD

All prices exclude delivery | digging and connections to the house

AiroGreen was developed by MCG Ltd for New Zealanders.

The AiroGreen Wastewater treatment system is designed to quietly and efficiently deal with 2,000 Litres per day of household effluent and is manufactured to international standards.

Advantages and Features

- Highest quality concrete construction, able to be fully buried
- Only 2 risers and lids 50mm above ground showing.
- Manufactured to exceed AS/NZS 1546 and AS/NZS 1547 standards
- One chamber, therefore only one hole, and one connection
- Full installation done on site – just connect to power
- Simple electrical hook-up and installation
- Simple waterproof controls and alarm system
- Better emergency capacity
- Low maintenance design
- Irrigation field can be landscaped and unobtrusive
- Quiet, economical running
- High quality treated wastewater output

AIROGREEN Aerated Wastewater Treatment System

Ensures Peace of Mind

MCG production facility has been manufacturing concrete products for over 80 years and introduced the latest technology to Wastewater Treatment Plants. our sewage systems have proven their performance over the last 20 years throughout Australasia

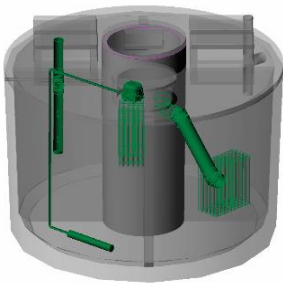

Back-up Service

Every treatment plant sold in New Zealand must be serviced by qualified MCG personnel Included in your purchase price the first years servicing is free of charge. Most Councils require regular servicing as part of their consent, we offer a complete Service Contract to ensure your system runs at its optimum.

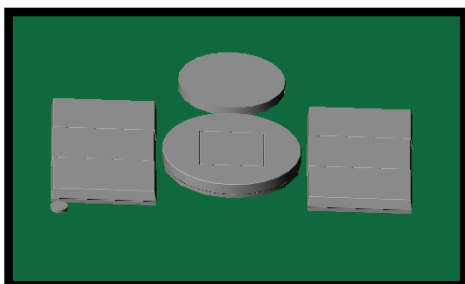

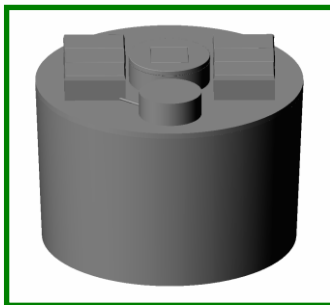

Environmentally Friendly

Our Earth's future depends on how well we treat it.

MCG has created a wastewater treatment system that will ensure all wastewater is treated entirely so that only clean effluent is discharged, therefore saving water and helping the environment. Your AiroGreen will operate at its best if you use biodegradable products in your household.

INSTALLATION IN PROGRESS

The Airogreen Wastewater System is a single unit tank. It can be buried without problem and only 50mm of the risers & lids need to be above ground to allow the system to breathe in the air used in the process & to prevent ground water ingress
