Smarter

PPC Strategies

to Maximize Your ROI

Presented by

www.marketing-angle.com

1 Nail the Basics

Strong PPC starts with sharp copy, relevant landing pages, and precise targeting.

- Write clear, compelling ad copy (not just catchy–relevant).
- Test different ads (A/B test headlines, descriptions, CTAs).
- Make sure your landing pages match your ad intent.
- Ensure your keywords and ad copy work together.

TIP: *If it's not converting, it's probably not aligned – revisit your message-match.*

2

Let PPC Boost Your SEO

PPC and SEO shouldn't compete—they should work together.

- Use PPC data to find keywords that convert – then build SEO content around them.
- Run ads on the same keywords you're ranking for organically (this boosts visibility and click-through rates).
- Combine learnings from both to refine your content strategy.

TIP: *When your paid ads and your website's organic listing both show up in search results, your chances of getting clicks can increase by as much as 77%.*

3 Think **Beyond** Conversions

PPC isn't just for sales – it's for awareness, content promotion, and nurturing.

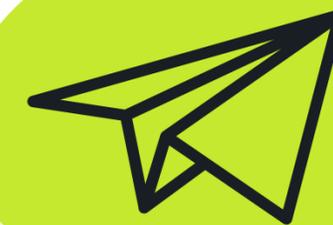

Build Brand Awareness

Introduce your business to new audiences and stay top-of-mind with consistent visibility.

Educate Early-Stage Buyers Use PPC to share helpful content that builds trust before they're ready to make a decision.

Promote Timely Offers Reach ready-to-buy customers with targeted ads that highlight your latest deals or promotions.

TIP: *Target users across the funnel – not just at the end.*

4 Reach **New** Audiences

PPC lets you test markets and ideas fast.

- Use trending topics or seasonal events in your copy.
- Target adjacent audiences with crossover interests.
- Try unique campaigns and monitor results quickly.

TIP: *Some of your best-performing audiences may not be your “ideal” ones on paper.*

5 Target Anywhere, Everywhere

Location, behavior, device,
interest – you can target it all.

- Use geo-targeting to get hyper-local.
- Run remarketing ads to stay top-of-mind.
- Create special campaigns for returning visitors.

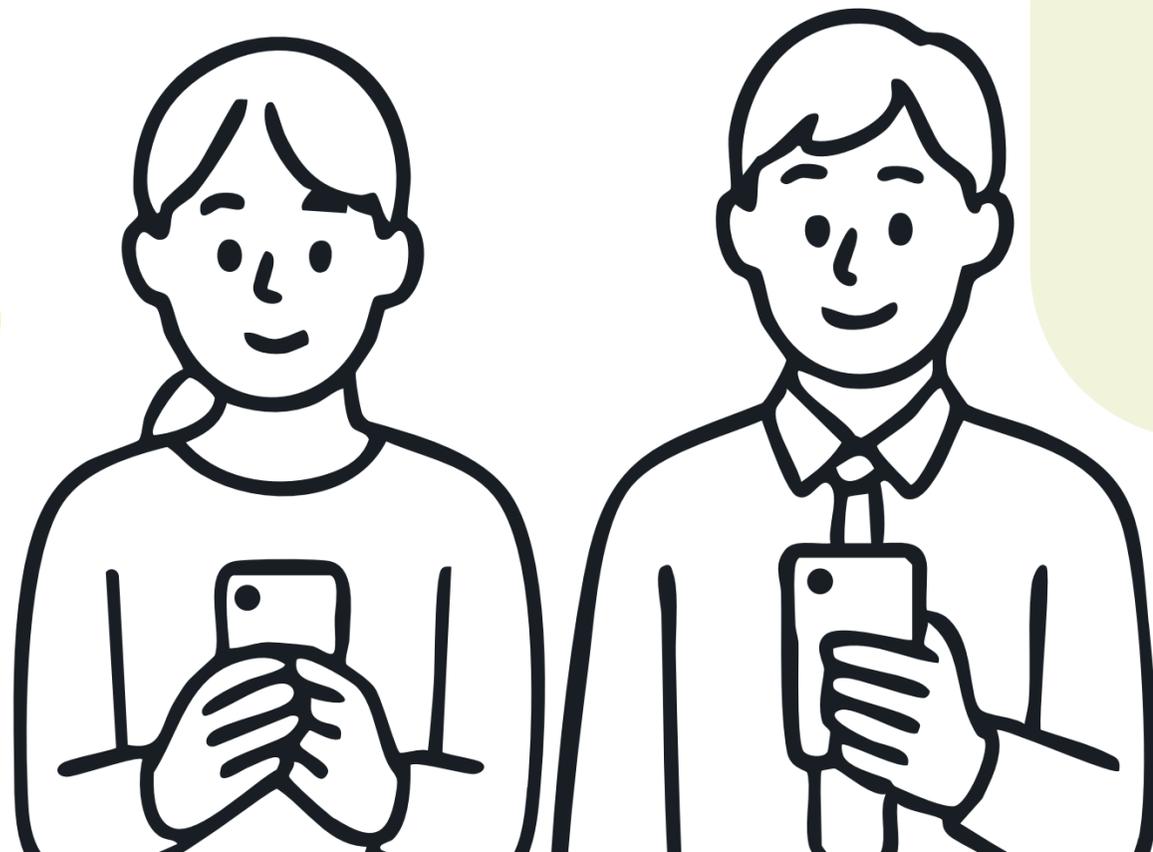

TIP: Remarketing ads boost conversion by reminding users who already know you.

6 Spy on Your Competitors

Competitive research = PPC gold.

- SpyFu, SEMrush, Google Auction Insights
- See which keywords they're bidding on
- Monitor their ad copy and landing pages
- Spot gaps or patterns you can capitalize on

TIP: *Learn what's working for them – then do it better.*

7

Measure What Matters

Clicks are nice – conversions pay the bills.

- Know which keywords convert (not just attract traffic).
- Use call tracking and form tracking to connect the dots.
- Optimize based on performance – not assumptions.

TIP: *Fast response times = more conversions. Speed counts!*

Great PPC is about

- **strategy**
- **testing**
- **alignment**

It's not just "set it and forget it."
Keep optimizing, stay curious, and
use data to guide every move.

Need Help with PPC?
