Our comments:

1. At the moment we noticed most of the flights arrive in Bishkek land approximately between 3-5 am.
Therefore, we made the change of adding a Pre-night. This way the travelers receive the rooms at the hotel upon arrival, have some hours of rest and shower, followed by a late breakfast (approx. at 10:30/11:00).
It allows a smoother landing before beginning the journey.
2. **This amazing destination is located in high altitude. Please note that some of the sites / overnights are located 3000-4500 mt above sea level.**
