

Terry Wilson

Antler Designs

erry Wilson specializes in handcrafting only the highest quality antler lighting, furniture and home accessories using only naturally shed whitetail, muledeer, fallow, elk and moose antlers.

Antlers normally range from light to dark brown in color, but after they have been shed the elements of nature can bleach the antlers. I use only the highest quality brown antlers on all products unless you request otherwise. Since antlers come in all shapes and sizes, each design is a unique piece and dimensions are all approximate.

Designs are balanced to perfection. All lights are straight up, all wiring is concealed internally, no exposed screws, no gaps and very little putty is used. When holes are created the surface is restored and blended to be virtually invisible. Antler parts are used whenever possible for details and lighting cups. All components are U.L. listed.

The designs featured are only an example of items available. Custom orders are welcome. I can also use your antlers providing a discount and sentimental value.
