Mistall Turns 8

Happy Birthday Mistall!

This month - and all month - we are celebrating 8 years of counting cars and kicking butt, and we're all out of butts.

Please excuse our low budget AI generated image. We spend all our revenue on sexy data visualizations!

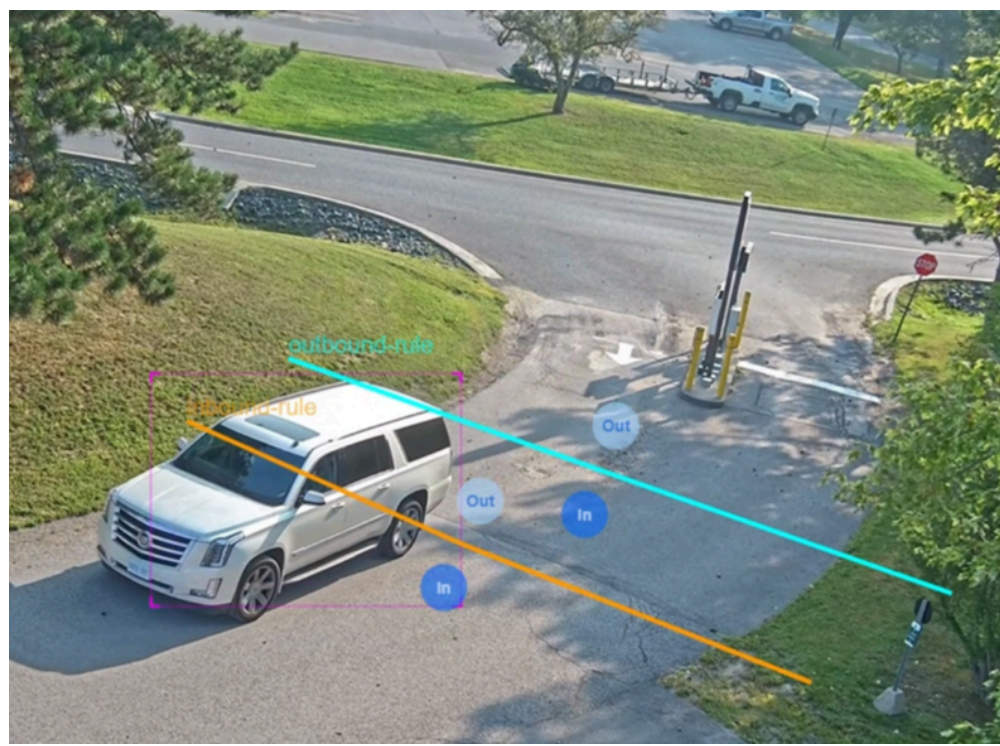

Your Cameras, Your Data

Not only do the number of security cameras on campus continue to grow, they are getting smarter. Mistall integrates with your cameras to obtain [Stall Counter](#) and [Zone Counter](#) occupancy data.

Mistall continually invests in keeping up with rapidly evolving camera technology (AXIS, Hanwha, Avigilon, Vivotek, Cisco, and others) so that you can leverage your cameras to count vehicles.

Ask us how we can use your cameras!

37 Integrations

Yes - it's an awesome name for a band - it's also the number of standard Mistall integrations. We take the data from your parking systems and turn it into valuable occupancy data. Aggregating your parking data provides you with unique operational insights.

Is winter over yet?

It's a good thing the wipers are up
