Items displayed: 8

Plates are recorded in Mistall through our many [integrations](#) like LPR, mobile payments, and pay stations. Those plates can tell a story.

Get unprecedented insight into where your parkers park, how long they park, and the source of data.

Every time you see a plate, Mistall sees it too.

Reservations = Future Occupancy

We have historical occupancy, we have current occupancy and now we support future occupancy!

We've started with HONK Reservations, with others on the horizon. If you're using reservations, you know it can be a big factor in identifying future capacity, and helping you decide where and when to sell more permits, and ultimately, at what price. Let me know if you would like more [information](#).

Welcome Jackie

We're pleased to announce that Jackie White has passed the Mistall new employee initiation and hazing period!

Jackie brings experience in Customer Support, Training, Documentation, other duties as assigned, and significantly lowers the average age of Mistall employees.

Fast and Furious XXVI: Slow & Careful
