What's inside...

- Security is Tight with 2FA
- PARCS Occupancy Data from TIBA
- April Events
- Something Funny

Security is Tight

Mistall now offers Two-Factor Authentication! Even though we don't track PII (Personally Identifiable Information) keeping your data secure is a top priority.

PARCS

An Excellent Source of Occupancy Data

Mistall is pleased to announce a new PARCS integration with TIBA.

PARCS (Parking Access Revenue Control) solutions are an excellent source of occupancy data. Our customers want to see their PARCS occupancy aggregated with their other

occupancy data, and it can include plate data with each transaction. With plates we can identify a deeper level of data such as vehicle breadcrumbs and dwell time metrics.

In related news, Mistall has expanded our ability to import license plates along with parker classification. Break down your occupancy to better understand who is using your facilities and when.

April Events

- BC Trippin' - Blake and Franklin travelling to British Columbia starting April Fools Day. This is no joke - follow along on [LinkedIn](#) to keep up with all our (mis)adventures.
- April 16/17, Mistall will attend the [NYS Higher Education Parking & Transportation Roundtable at the University of Buffalo](#).

Try our new valet parking!
