Renovate the Exterior of the Offices and Rectory

Why? Following close to six decades of use, our parish office building/rectory is sorely in need of some tender loving care! Originally constructed as a residence for three priests, the downstairs was long ago converted into office space, and the upper living area is largely public space, used by various ministries in the parish. Renovation of this building will take several years to complete, and we plan to take the process one step at a time and complete what we can with funds available. Our first step will be to have a contractor and architect examine the entire building, inside and out, and create a plan for what needs to be done. We already know we'll need to replace the roof, repair and replace siding as necessary, repair cracks in the chimney, replace the overhang at the entrance to the offices and the "greenhouse" over the storage shed. Following exterior renovations we'll begin interior renovations to include new wall surfaces, energy-efficient windows, new electrical wiring, carpeting, paint, updated bathrooms, and other items as suggested by the architect and contractor. Together we can tackle this last building on our campus and thereafter enjoy our beautiful home for years to come. **Thank you!**
