**Cleveland Bay Horse Society**  
Registered Charity No. 293872

## **GUIDANCE NOTES ON THE BRITISH HORSE PASSPORT (for any UK horse, pony or donkey)**

Thank you for your interest in our British Horse Passport. This pack provides the registration forms, together with one or two notes which we hope will be of assistance. If you own an unregistered pure or part bred Cleveland Bay please check the notes for guidance of those passports to see whether you could register there.

**The British Horse Passport issued by CBHS is a basic ID passport only and is intended for horses with no known (or provable) breeding . Nowhere within the passport will it give reference to a breed or have any parentage or anything else written in it. It may only be marked as Breed Unknown and Type Unknown. If you know your horse's breeding, and want it recorded as part of its registration, you should contact the appropriate breed society for a passport.**

1. By law every horse should have a passport whilst still a foal so there is no scope for error on its foaling year. Legally the passport should have been applied for by the time the animal is 6 months old (or 30<sup>th</sup> November of its foaling year whichever gives most time) but it is better to apply late than not at all. Anyone caught by their Local Authority without a passport for each equine may face prosecution. Failure to comply can be punishable by a fine of £5000 or 3 months imprisonment.
2. From 1 January 2016, if horses are registered outside the time limits the Passport issuer is required to sign Part II of Section II of the passport so that the animal may never enter the food chain. The Passport will also be stamped 'Duplicate' throughout.
3. With effect from 1 July 2009 a passport can only be issued to a horse (of any age) if it has been microchipped. The microchips (with 15-digit numbers) should be obtained via your vet and the vet must mark the location of the chip with an 'm' in a circle on the ID chart.
4. A declaration as to whether the horse is or in not intended for slaughter for human consumption is included in the passport but this does not have to be completed until any of the following:
  - It's a late registration (see paragraph 2 above)
  - the horse is exported,
  - the horse is administered with a medicine which should never be administered to a food producing animal,
  - the horse is consigned for human consumption.

### **REGISTRATION FEE**

Initial registrations must be accompanied by the correct fee with cheques made payable to 'The Cleveland Bay Horse Society'. Currently the fee is £55.

## APPLICATION FORM

### Passport type

Replacement Passports will be issued for all new passport applications unless the animal is a foal, or we are issuing a Duplicate passport.

### Identification Chart

The identification chart must be printed on A4 (8.27" x 11.69") paper and completed by a Veterinary Surgeon. It must be completed neatly, as it will be copied directly into the passport, and record at least 5 identifying features enabling the animal to be positively identified if a microchip scanner is not available. If you are unable to find three whorls (simple or linear) then EU law requires the chestnuts to be drawn. The diagram and text must match.

### Foaling Date

The law requires all horses obtain a passport as a foal, although some owners do still apply late.

Owners (and buyers) can be confident that the year of foal recorded in the passport is based on the information provided to us at the time of registration. It is therefore important when considering the stated age of the animal that you look at the both the date of foal recorded in the passport and the date the passport was issued.

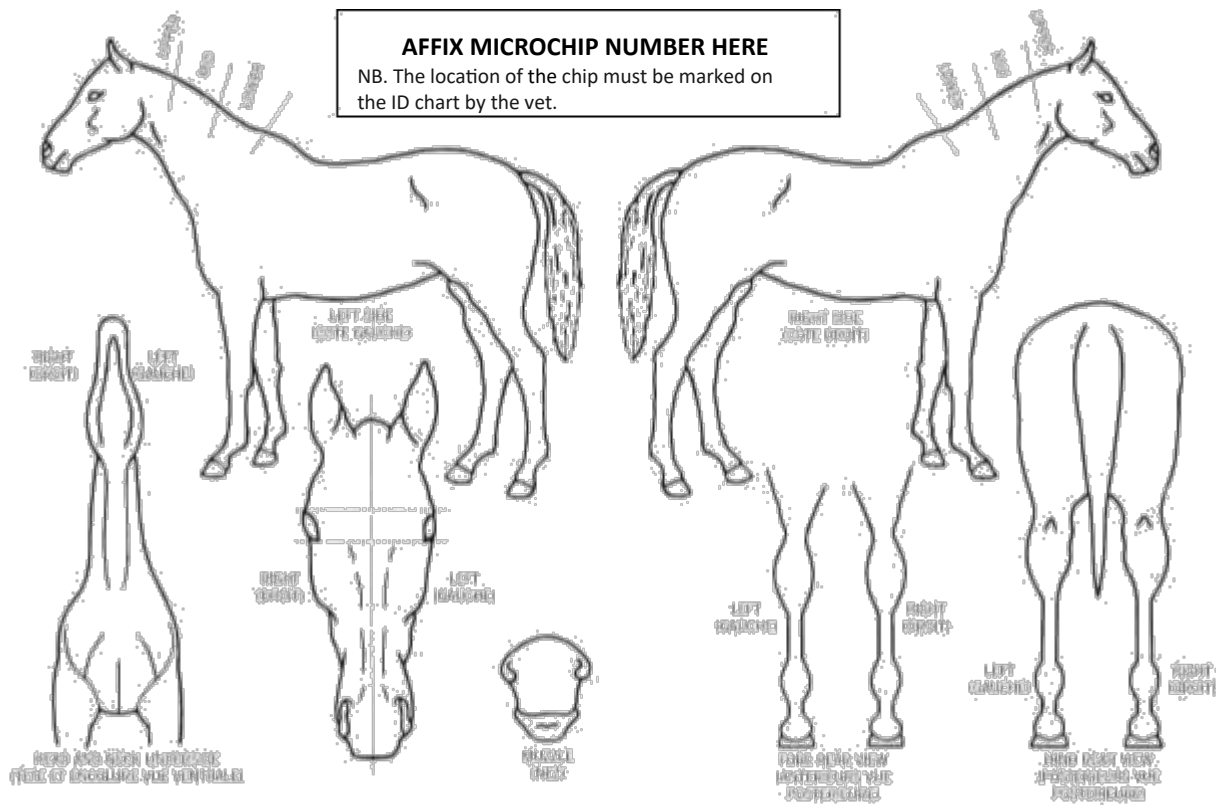

Where the stated date of birth is within 6 months of the Issue Date, or within the same calendar year you can have a much greater level of confidence regarding the stated age.

It is possible that for older animals the vet may have relied on aging by dentition to verify the year of foal stated by the owner. The limitations regarding the accuracy of Aging by Dentition were highlighted in a 1995 study by Bristol University. If the age of the animal is later disputed we will not accept an alternative year or date but may record it as unknown.

We recommend if you are registering an older horse and you are unsure of its year of foaling you ensure the vet selects Unknown.

- *One horse, one passport.* If the animal already has any sort of registration/identification document these, or copies must be included with the application.

PLACE AND DATE OF IDENTIFICATION <i>Circonscription et date</i>	SIGNATURE AND STAMP OF VETERINARY SURGEON OR COMPETANT AUTHORITY <i>Signature et cachet du vétérinaire agréé (ou de l'autorité compétente)</i>
--	---

**DESCRIPTION TO BE TYPEWRITTEN OR COMPLETED IN BLACK INK – BLOCK CAPITALS**

The recommended procedure for identification is described in the FEI booklet 'Identification of Horses'. The diagram and written description must agree and must be sufficiently detailed to ensure the positive identification of the animal in future. Feet should always be described. White markings to be shown in 'RED', whorls to be shown thus 'X'. \*If less than 3 whorls (simple or linear) then please include an outline of each chestnut on table overleaf. Mark the location of the chip with an 'm' in a circle on the ID chart. †Information supplied by owner.

† Name of Animal ( <i>Nom</i> )		Colour ( <i>Robe</i> )	Sex ( <i>Sexe</i> )	† Date of Birth	Height if Adult
Head ( <i>Tête</i> )		Neck ( <i>Encolure</i> )			
F o Limbs	LF ( <i>Ant G</i> )	LH ( <i>Post G</i> )			
	RF ( <i>Ant D</i> )	RH ( <i>Post D</i> )			
Body ( <i>Corps</i> )		Acquired Marks			
<b>CERTIFICATE</b> to be signed by the Veterinary Surgeon: I certify that this animal has been microchipped and that no evidence of previous microchip has been detected.			NAME in capitals ( <i>nom en lettres capitales</i> )		
Address ( <i>Adresse</i> )					
Signature ( <i>Signature et cachet du vétérinaire agréé (ou de l'autorité compétente)</i> )			Date		

## Chestnuts

The outline of each chestnut must be drawn in the appropriate square for all horses without markings and with less than three whorls.

### Châtaignes

Pour tous les chevaux ne présentant aucune marque et ayant moins de trois épis, le contour de chaque châtaignes doit être dessiné dans le carré correspondant.

## **Cleveland Bay Horse Society**

Registered Charity No. 293872

### **Legal Responsibilities of Owners in relation to Equine Passports 2016**

#### **Passports**

It is a legal requirement for all horses and ponies to be issued with a passport. Horse Passport law is governed by the commission Regulation EC 504/2008, and in England by the Horse Passport regulations 2009, and where applicable, any subsequent amendments or successors to these regulations. Passports are required throughout the EU for identification, effective disease control and in order to protect the human food chain.

Owners and keepers with primary responsibility must ensure their horses are correctly identified and be able to produce the passport without delay when required. All horses, ponies, donkeys and other *equidae* are required to have a passport from 6 months of age, or by 30<sup>th</sup> November in the year of their birth, whichever is the later.

A horse's passport must be kept with him at all times. This includes any time the horse leaves the yard, such as to go to a show, on loan or away for schooling. It is illegal to travel a horse without their passport, unless they are being transported for emergency veterinary treatment. The passport must be produced within three hours of it being requested by enforcement agencies. The passport may be requested at any time but the most common situations where a horse's passport will be requested include:

- When the animal is moved into or out of Great Britain;
- When the animal is used at a competition;
- When the animal is moved to new premises;
- When the animal is presented at a slaughterhouse for slaughter;
- When the animal is sold;
- When the animal is used for breeding purposes.

The passport must accompany the horse at all times, except:

- When stabled or on pasture and the passport can be produced without delay;
- When it is moved temporarily on foot in the vicinity of the holding and the passport can be produced without delay;
- When it is moved on foot between summer and winter grazing and the passport can be presented at the holding of departure;
- Un-weaned and accompanied by its dam or foster mare;
- When it is participating in training or competition which requires them to leave the event venue;
- When moved or transported under emergency conditions. Vets will require the passport when prescribing many common veterinary medicines, (for example "Bute") and will ensure the horse in question is then permanently excluded from the human food chain by signing Part II of Section II of the passport.

The Meat Hygiene Service (MHS) is responsible for enforcing the checks carried out at slaughterhouses, and Local Authorities (Trading Standards Departments) are responsible for enforcing the law elsewhere. As with all government legislation, there are penalties that may be applied by the courts for non-compliance. Most offences have a fine of up to £5,000, two years' imprisonment or both.

Applications for equine passports can only be accepted for micro-chipped animals and the owner or keeper must ensure that the equine does not already have an existing passport. When the passport is received, it should be carefully checked to ensure all the details are correct, and then signed where required on the owner's page.

No animal may have more than one passport. Passports are the property of the Passport Issuing Organisation (PIO) and the passport must be returned to the issuing PIO:

- If the animal changes ownership (within 30 days);
- If any alterations are required (for example: update of adult colour, castration)(within 30 days);
- If extra pages are required for vaccination records, etc;
- If the document is damaged;
- If a veterinary surgeon has completed and signed Part II of Section II of the passport (within 14 days);
- When the animal dies (within 30 days).

### **Late Passports**

Passports may still be acquired for horses older than the passport deadline, provided there is no existing passport for the animal. Applications should be made to the appropriate PIO for the breed of the horse and should include appropriate checks and fees. Before the passport is issued to the owner, the issuing PIO will sign Part II of Section II to permanently exclude the horse from the human food chain. The passport will also be stamped 'Duplicate' throughout.

### **Duplicate Passports**

If a passport is lost, a duplicate may be requested from the original PIO. On receipt of appropriate fees and checks, a duplicate passport may be issued, in which Part II of Section II will have been signed by the PIO, to permanently exclude the animal from the human food chain. The duplicate passport will be stamped as a duplicate, and should the original passport ever be found, it must be returned to the issuing PIO immediately.

### **Transfers of Ownership**

The horse passport does not constitute proof of ownership of the horse. However, it is a requirement under the Horse Passport (England) Legislation to register a change of ownership with the relevant PIO within 30 days of acquiring a horse. The issuing PIO may require a completed transfer form and fees.

It is an offence to sell a horse without a passport. Sale of any horse should not be completed if the passport has not been provided. The passport must match the horse in question. If the purchaser does not receive the horse's passport, they will also be committing an offence when transporting the horse to its new home.

### **Return of the Passport**

**In the event of the death of any horse, the passport must be returned to the issuing PIO for cancellation within 30 days of the death. Owners may request the return of a passport following cancellation. Any such returned passport will be clearly stamped 'invalid' to prevent any fraudulent use. Slaughterhouses will return passports to the PIO concerned directly.**

## Breaches of the Regulations

### A breach of regulations will occur in the following circumstances:

- Where a passport is applied for outside of the statutory time limit (6 months from the date of birth or before 30<sup>th</sup> November in the year of birth, whichever is later). This is with the exception of rescued equines and those who have purchased a horse without a passport;
- Where a passport is applied for when one already exists for that animal;
- Failure of a new owner to update owner details within 30 days. This applies regardless of the length of time the person was in possession of the equine;
- Failure of an owner to return a passport for updating within 6 weeks of notification that the passport does not meet the current legal requirements;
- Signs of unofficial changes to passport details, tampering or fraud.

### NON-EU BREEDERS/OWNERS

These regulations are not mandatory for non-EU breeders/owners, however, it would greatly aid the Society's records and breeding programmes if passports were returned to the Society:

- If the animal changes ownership (within 30 days);
- If any updates are required (for example: update of adult colour, castration)(within 30 days);
- If extra pages are required for vaccination records, etc;
- If the document is damaged;
- If a veterinary surgeon has completed and signed Part II of Section II of the passport (within 14 days);
- When the animal dies (within 30 days).

If any alterations are required, for example; an update of adult colour, acquired marks, castration, please inform the Society by email. These changes will be kept on the database and added to the passport the next time it is returned to the Society;
