Guidance Notes for Completion of Part Bred Applications

By law, every horse should have a passport whilst still a foal so there is no scope for error on its foaling year. Legally the passport should have been applied for by the time the animal is six months old (or the 30th of November of its foaling year whichever gives most time) but it is better to apply late than not at all. Anyone caught by their Local Authority without a passport for each equine may face prosecution. Failure to comply can be punishable by a fine of £5000 or three months imprisonment. From the 1st of January 2016, if horses are registered outside the time limits the Passport issuer is required to sign Part II of Section II of the passport so that the animal may never enter the food chain. The Passport will also be stamped 'Duplicate' throughout.

With effect from the 1st of July 2009, a passport can only be issued to a horse (of any age) if it has been microchipped. The microchips (with 15-digit numbers) should be obtained via your vet and the vet must mark the location of the chip with an 'm' in a circle on the ID chart. Microchipping is not a legal requirement for non-UK registered horses but is strongly recommended to aid identification in cases of dispute.

Eligibility

To be eligible for the CBHS Part Bred Register an animal should have at least one great grandparent entered with a name and a number in the Cleveland Bay Horse Society Stud Book (pure) with a minimum of 12.5% Cleveland Bay blood to be eligible for registration.

Breeding

DNA parentage testing is recommended but not mandatory for animals entering the CBHS Part-bred register, unless the owner wishes to demonstrate pedigree that cannot be proven any other way. The exception to this is any filly that may be eligible for grading up, and it is recommended that such a filly is DNA tested upon initial registration. The owner will be responsible for producing evidence and resolving any pedigree query to the satisfaction of the CBHS as a PIO. The Society may accept applications where the breeding is not proven but the passport will be stamped accordingly. See below for guidance on Part-bred passport requirements.

Basic Part-bred passport (DNA unverified) - CB pedigree noted

Available to foals bred from a registered pure or part-bred mare, or the pedigree is proven by the production of a licensed stallion covering / AI certificate / confirmation

Part-bred passport (CB DNA verified) – Full CB pedigree recorded

A hair sample collected by your Vet must accompany this application form

Part-bred passport (Full Pedigree DNA verification) – Complete pedigree recorded

The owner will be required to provide a copy of any passport from another PIO where applicable to evidence the foal's non-CB pedigree, and any covering / AI certificate / confirmation. Any costs incurred in the evidencing process from another PIO / Stud Book must be covered by the applicant prior to release of the passport. (You will be advised of any additional costs that may be incurred prior to ANY DNA testing commencing)

Identification Chart

The identification chart must be printed on A4 (8.27" x 11.69") paper and completed by a Veterinary Surgeon. It must be completed neatly, as it will be copied directly into the passport, and record at least five identifying features enabling the animal to be positively identified if a microchip scanner is not available. If you are unable to find three whorls (simple or linear) then UK law requires the chestnuts to be drawn. The diagram and text must match.

Extended Pedigrees

The extended pedigree in the passport goes to one generation further than this form. If further breeding is known, please attach on a separate sheet.

Overstamping

Part-breds registered with other PIOs may apply to have their passports overstamped by CBHS. The link to a named purebred Cleveland Bay will have to be proven and if necessary, this may be done using DNA verification against the named pure Cleveland Bay parent if the relevant DNA is held on the Society's file. If DNA needs to be taken to provide documentary evidence, then the appropriate fee must be included with the application. If unsure, please contact the CBHS office. It may be that the horse to be overstamped already has had DNA taken, in which case we need approval to use it.

If a passport only shows the breeding as 'CB/TB', for example with no other information available, the Society's DNA records will not be able to help identify the unknown CB and overstamping will not be possible.

To apply for an overstamp, please send your horse's passport together with the fee (see the current list price on the website), plus any documentary or DNA evidence. Where DNA is required to be tested, an additional fee is incurred.

You will also need to submit a hair sample (please ensure roots are pulled).

Entry Requirements

If you cannot meet any of the requirements on this form please contact the Society for further assistance.

CHECKLIST

Have You Enclosed?

- ☐ The appropriate Fees & Postage (please visit the website for an up-to-date list of fees and payment options);
- ☐ The Sire's covering certificate or other documentary passport evidence – is it valid for the correct stallion and year and are any copy passports provided complete and readable;
- ☐ If required; a hair sample including the root for DNA (collected by a vet at the time of completing the ID chart in a sealed bag and signed by the vet). Please see instruction document "hair samples for DNA testing" on CBHS website for hair collection requirements.

Has the registration form been completed?

- ☐ Name, sex, date & place of birth, breeder's details, owner's details if applicable;
- ☐ The Breeder's declaration;
- ☐ The ID chart signed by a vet and the microchip number and location noted.

(Note microchips are optional for non-UK breeders but strongly recommended to aid identification in case of disputes)

Incomplete or incorrect applications take up valuable office time and will delay the issue of a Passport; incomplete documentation may incur resubmission / processing charges.

Prefix Use

Are you using a prefix for the name of your horse? – Please refer to the Society’s prefix rules. A copy of which can be found on the website:

<https://www.clevelandbay.com/downloads>

Please ensure the prefix is registered for use with the Cleveland Bay Horse Society by the person registering the horse. If you wish to apply for a new prefix or wish to extend a prefix you already own for use with the CBHS, the application form can be downloaded from the Central Prefix Register:

<https://www.centralprefixregister.com/>

Any queries regarding a prefix should be addressed to the Central Prefix Register.

Advisory

The CBHS are required to ensure the Central Prefix Register rules are complied with.

*Are you using more than one name (word) for the horse on this application? If yes, is the 1st name (word) a prefix registered to you for use with the CBHS? If yes, it will be accepted. If not, you have three options. Either you will need to register the first name (word) as your prefix if it is a name (word) you would use in the future; **or** choose to combine both names (words) e.g. Orange Blossom becomes Orangeblossom; **or** you can use another one word name.*

Any one word name can only be used once, so if you or another breeder has used the one word name previously for a registration, you will need to choose a different name (that could be by e.g. placing a I or II on the end of the name).

Please do not use the words “Bay”, “Royal”, or “Heir” when choosing a name.

Legal Responsibilities of Owners in relation to Equine Passports

Passports

It is a legal requirement for all horses and ponies to be issued with a passport. Horse Passport law is governed by the The Equine (Records, Identification and Movement) (Amendment) (EU Exit) Regulations 2019, and subsequent devolved legislation, and where applicable, any amendments or successors to these regulations. Passports are required throughout the UK for identification, effective disease control and in order to protect the human food chain.

Owners and keepers with primary responsibility must ensure their horses are correctly identified and be able to produce the passport without delay when required. All horses, ponies, donkeys and other equidae are required to have a passport from six months of age, or by the 30th of November in the year of their birth, whichever is the later.

A horse's passport must be kept with them at all times. This includes any time the horse leaves the yard, such as to go to a show, on loan or away for schooling. It is illegal to travel a horse without their passport, unless they are being transported for emergency veterinary treatment. The passport must be produced within three hours of it being requested by enforcement agencies. The passport may be requested at any time but the most common situations where a horse's passport will be requested include:

- When the animal is moved into or out of Great Britain;
- When the animal is used at a competition;
- When the animal is moved to new premises;
- When the animal is presented at a slaughterhouse for slaughter;
- When the animal is sold;
- When the animal is used for breeding purposes.

The passport must accompany the horse at all times, except:

- When stabled or on pasture and the passport can be produced without delay;
- When it is moved temporarily on foot in the vicinity of the holding and the passport can be produced without delay;
- When it is moved on foot between summer and winter grazing and the passport can be presented at the holding of departure;
- Non-weaned and accompanied by its dam or foster mare;
- When it is participating in training or competition which requires them to leave the event venue;
- When moved or transported under emergency conditions. Vets will require the passport when prescribing many common veterinary medicines, (for example "Bute") and will ensure the horse in question is then permanently excluded from the human food chain by signing Part II of Section II of the passport.

The Meat Hygiene Service (MHS) is responsible for enforcing the checks carried out at slaughterhouses, and Local Authorities (Trading Standards Departments) are responsible for enforcing the law elsewhere. As with all government legislation, there are penalties that may be applied by the courts for non-compliance. Most offences have a fine of up to £5,000, two years imprisonment or both.

Applications for equine passports can only be accepted for microchipped animals and the owner or keeper must ensure that the equine does not already have an existing passport. When the passport is received, it should be carefully checked to ensure all the details are correct, and then signed where required on the owner's page.

No animal may have more than one passport. Passports are the property of the Passport Issuing Organisation (PIO) and the passport must be returned to the issuing PIO:

- If the animal changes ownership (within thirty days);
- If any updates are required (for example: update of adult colour, castration) (within thirty days);
- If extra pages are required for vaccination records, etc;
- If the document is damaged;
- If a veterinary surgeon has completed and signed Part II of Section II of the passport (within fourteen days);
- When the animal dies (within thirty days).

Late Passports

Passports may still be acquired for horses older than the passport deadline, provided there is no existing passport for the animal. Applications should be made to the appropriate PIO for the breed of the horse and should include appropriate checks and fees. Before the passport is issued to the owner, the issuing PIO will sign Part II of Section II to permanently exclude the horse from the human food chain. The passport will also be stamped 'Duplicate' throughout.

Duplicate Passports

If a passport is lost, a duplicate may be requested from the original PIO. On receipt of appropriate fees and checks, a duplicate passport may be issued, in which Part II of Section II will have been signed by the PIO, to permanently exclude the animal from the human food chain. The duplicate passport will be stamped as a duplicate, and should the original passport ever be found, it must be returned to the issuing PIO immediately.

Transfers of Ownership

The horse passport does not constitute proof of ownership of the horse. However, it is a legal requirement to register a change of ownership with the relevant PIO within thirty days of acquiring a horse. The issuing PIO may require a completed transfer form and fees. It is an offence to sell a horse without a passport. Sale of any horse should not be completed if the passport has not been provided. The passport must match the horse in question. If the purchaser does not receive the horse's passport, they will also be committing an offence when transporting the horse to its new home.

Return of the Passport

In the event of the death of any horse, the passport must be returned to the issuing PIO for cancellation within thirty days of the death. Owners may request the return of a passport following cancellation. Any such returned passport will be clearly stamped 'invalid' to prevent any fraudulent use. Slaughterhouses will return passports to the PIO concerned directly.

Breaches of the Regulations

A breach of regulations will occur in the following circumstances:

- Where a passport is applied for outside of the statutory time limit (six months from the date of birth or before 30 November in the year of birth, whichever is later). This is with the exception of rescued equines and those who have purchased a horse without a passport;
- Where a passport is applied for when one already exists for that animal;
- Failure of a new owner to update owner details within thirty days. This applies regardless of the length of time the person was in possession of the equine;
- Failure of an owner to return a passport for updating within six weeks of notification that the passport does not meet the current legal requirements;
- Signs of unofficial changes to passport details, tampering or fraud.

Non-UK Breeders / Owners

These regulations are not mandatory for non-UK breeders / owners, however, it would greatly aid the Society's records and breeding programmes if passports were returned to the Society:

- If the animal changes ownership (within thirty days);
- If any updates are required (for example: update of adult colour, castration) (within thirty days);
- If extra pages are required for vaccination records, etc;
- If the document is damaged;
- If a veterinary surgeon has completed and signed Part II of Section II of the passport (within fourteen days);
- When the animal dies (within thirty days).

If any alterations are required, for example; an update of adult colour, acquired marks, castration, please inform the Society by email. These changes will be kept on the database and added to the passport the next time it is returned to the Society.

Part Bred Entry Form - Cleveland Bay Horse Society
