chromeOS

Models certified for ChromeOS Flex

ADVANTECH

USC-360

POS System

Rich peripherals for diverse applications

IP65-rated front panel with water and dust resistance

Sleek modern design with dual hinge stand

The USC-360H and USC-360J is Advantech's newest all-in-one service computer, featuring Intel® Celeron® J6412 and Rockchip RK3568 processors for cost-effectiveness and energy efficiency in retail and hospitality. Its ultra-slim design ensures easy installation in various environments.

UBX-110

Box Computer

- Triple-display player
- Thermal isolation top cover to ensure safe installation and user touch

Compact, fanless edge computer
for high-performance multitasking

Intel® N97 or Core™ i3-N305
built-in processing

The UBX-1110K features a compact, fanless design and built-in Intel® N97or Core™ i3-N305 processor. Supporting triple displays up to 4K UHD resolution, it offers flexible mounting options and is ideal for high-performance, multitasking applications.

UTC Series

All-in-One Computers

UTC-115

Low power and fanless system design

UTC-120

Slimmer and lighter design

UTC-124

Slimmer and lighter design

UTC-320

Detachable frame design for panel mount application

UTC-520

Aluminum extrusion design

Advantech UTC systems are slim, rugged All-in-One touch computers designed for retail self-service, interactive signage, and digital touchpoints - built for reliable 24/7 operation and easy installation. Learn more about the UTC portfolio on our website.

ARK-1125

Embedded Computer

- Versatile I/O & expansion
- Ultra-slim, fanless embedded PC for tough environments

Intel® N200 (N-series) + dual 4K HDMI independent displays

M.2 E Key and B Key for storage and wireless module installation

The Advantech ARK-1125H is an ultra-slim, fanless embedded PC for demanding applications like factory automation and kiosks. With Intel® N200, dual 4K HDMI, versatile I/O (incl. dual LAN and CANBus), M.2 expansion, optional TPM, and DeviceOn remote management, it’s a compact and rugged solution for reliable deployments.

DS Series

Signage Players

DS-085:

Intel Tiger Lake UP3 Ultra-slim Digital Signage Player

DS-202:

Intel SDM Player with 4K output

DS-410:

Palm-sized mini PC designed for hospitality and signage application

Advantech DS systems are compact, reliable digital signage players built to drive high-quality content - from single screens to multi-display setups - ideal for retail and public spaces.

PPC-3150S

Panel PC

Fanless, ultra-slim Panel PC powered by Intel® Pentium® N4200 (low power)

- Built for integration: 2x LAN, USB, configurable

- Built for integration: 2x LAN, USB, configurable

The Advantech PPC-3150SW is a high-value, ultra-slim fanless panel PC built for industrial HMI and interactive applications. It combines a 15.6" true-flat P-Cap touchscreen with an IP66-rated front, runs on Intel® Pentium® N4200, and offers flexible connectivity and storage - ideal for reliable, always-on deployments.

Why Choose chromeOS certified products?

Reduce maintenance and increase reliability:
ChromeOS is a fast, secure, and easy-to-manage platform for your kiosks and digital displays.

Keep systems secure and data safe:
ChromeOS includes regular security updates and built-in protection.

Easily monitor and manage it all, remotely:
Easily check the status of devices, receive proactive alerts, and remotely reboot if errors occur.

Take a more sustainable route:
Reduce your IT overhead, the time to deploy, and maintenance costs.

Privacy settings built for you:
Your privacy is protected by responsible data practices and innovative privacy technologies.
