Introducing to you Emerson Ecologics and the gold level manufacturers of supplements that we recommend.

Emerson Ecologics is a company that provides high-quality nutritional supplements, natural remedies, and other healthcare products. The company was founded in 1980 and is headquartered in Manchester, New Hampshire. They were founded to help healthcare providers improve patient outcomes through integrative medicine, which combines conventional medicine with complementary and alternative therapies. The company works with over 300 professional brands to provide healthcare practitioners with a wide range of products that support overall health and wellness.

Emerson Ecologics was acquired by Fullscript in 2018. Since the acquisition, Emerson Ecologics has continued to operate as a separate division of Fullscript, with its own team of experts dedicated to providing high-quality products and services to healthcare practitioners.

Most importantly to you, Emerson Ecologics has a comprehensive quality program in place to ensure that their products meet high standards of quality, purity, and potency. Here are some of the key aspects of their quality program:

- **Quality Assurance:** Emerson Ecologics partners with top-tier professional brands that have established quality control programs. **Each brand's products undergo rigorous testing and analysis** to ensure that they meet the highest quality standards.
- **Quality Control:** Emerson Ecologics employs a team of experts who conduct thorough inspections of all products before they are released for sale. This **includes testing for identity, purity, and potency.**
- **Good Manufacturing Practices (GMP):** Emerson Ecologics requires that all of their brands follow GMPs, which are a set of regulations established by the FDA to ensure that dietary supplements are produced in a consistent and controlled manner.
- **Verification:** Emerson Ecologics verifies the quality and potency of products through **independent third-party testing. They also verify the authenticity of ingredients and raw materials.**
- **Transparency:** Emerson Ecologics provides detailed information about their products, including ingredient lists, manufacturing processes, and test results.

Our goal in making these supplements available to you is to help you get the best quality at the lowest price. We see the offerings at every store and know that many are not worth consuming.

The Gold level supplement manufacturers available with your Fullscript account.

Here is a list of the brands that meet their gold level standards. We recommend you limit your purchases, through Fullscript, to one of these highly rated companies.
