

The background of the entire page is a detailed, monochromatic illustration of an eagle, likely a bald eagle, perched on a branch. The eagle's head is turned to the right, and its wings are partially spread. Behind the eagle, the stripes of the American flag are visible, flowing from the top right towards the bottom left. The overall tone is somber and patriotic.

Dear Memorialist,

Since 2011, Salem Stones has been committed to providing top-quality laser-etched memorials, combining advanced technology with our expertise in granite monument craftsmanship.

In this catalog, you'll discover a range of engravable designs that enable you to offer unique and personalized monuments to your clients. Our state-of-the-art laser etching process captures intricate details with precision, ensuring each memorial is a true work of art. Whether it's a cherished photograph or a custom design, our team is here to assist you in creating lasting tributes.

We understand the importance of quality and clarity in the images you submit, which is why we provide a comprehensive guide to help you and the families you serve select the best images for laser etching. Additionally, our team can enhance most images for the best possible results, even with less-than-optimal images.

Explore the possibilities with Salem Stones' laser etching services and let us help you create meaningful and personalized memorials for the families you serve.

Gratefully,

The Salem Stones Team

Laser Etching Vs. Hand Etching:

Laser etching and hand or 'diamond' etching offer distinct advantages for personalizing granite memorials. Laser etching uses high-precision lasers to create detailed, photo-realistic designs quickly and efficiently, making it ideal for intricate scenes and portraits. Hand or 'diamond' etching involves artisans manually engraving designs with diamond-tipped tools, adding a timeless, handcrafted quality.

While laser etching provides faster turnaround times and precise results, hand etching offers a unique, personal touch. Salem Stones offers both methods, with laser etching being the most common due to its efficiency and detail.

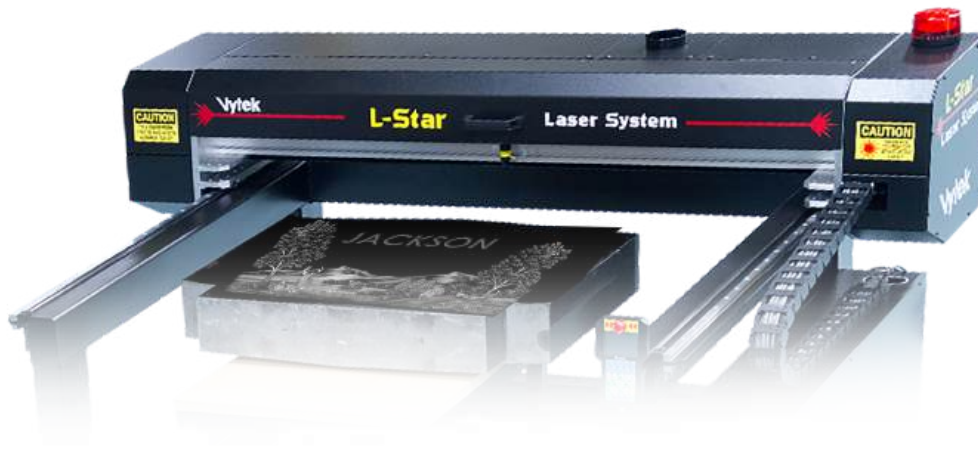

Laser Etched Design

Hand Etched Design

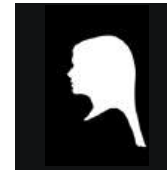

The Etching Process:

We use state of the art Vytex L-STAR laser etching machines

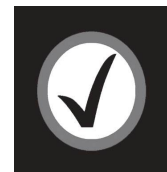

Step 1:

Send us your photographs, describe your needs, or choose from our designs.

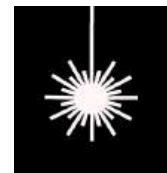

Step 2:

We will send you a design proof.

Step 3:

Approve your design

Step 4:

Our artists etch the design onto the monument.

Close up of hand-etching

Sample Laser Etching Design:

The family has requested a custom design based on their verbal description. They would like their farm featured in the design, along with elements such as their tractor, crop duster plane, guernsey cows and a wind turbine.

After receiving the content, we digitally create a rendering based on the family's design preferences. The family can then review the rendering, request changes, or approve the final design.

Photograph Resizing & Enhancement with AI (Artificial Intelligence)

When the image a family wants to use isn't of high enough quality for laser etching, our team can enhance it using AI tools. We can smooth background textures from older or historic photos, make minor repairs, and enhance details for razor-sharp images suitable for laser etching. This includes upscaling images up to 600%, eliminating compression artifacts, and restoring faces, resulting in cleaner, crisper, higher resolution output.

**Our team will let you know if we are unable to restore a submitted photo.*
