

COMPANY PROFILE

2026

Dajwood is a Queensland-based mining and civil services company providing a range of workforce, equipment and operational solutions to the resources and civil construction industries. We work with businesses to provide the people, equipment and support they need to keep projects and operations running safely and efficiently.

Our services include labour hire, HR and workforce solutions, equipment hire, mechanical and maintenance services, and shutdown support. We can provide skilled and experienced personnel to support a variety of site requirements, while our equipment hire services give clients access to reliable machinery and equipment when and where it is needed.

Through our labour hire and HR services, Dajwood helps businesses access suitable personnel while supporting workforce management and the requirements that come with operating in the mining and civil industries. Our team understands the importance of having reliable, capable people on site and works to provide workforce solutions that suit each client's requirements.

Our equipment hire and mechanical services complement our workforce capabilities, allowing us to support clients with both personnel and equipment requirements. From ongoing site operations to project-based work and shutdowns, we aim to provide practical solutions that help our clients maintain productivity and meet their project demands.

With experience across mining, civil construction and heavy equipment operations, Dajwood is equipped to support projects throughout Queensland with a combination of people, equipment, industry knowledge and operational support.
