

Dear Rising Second Graders,

Spend some time each week working on your math skills!

- Log into IXL and practice your starred skills.
- You will see 25 Math Skills on the Student Dashboard.
- You should practice each skill until you earn a SMART score of 80. After receiving your score of at least 80, the skill will then disappear.
- The goal is to have 0 skills remaining on the Student Dashboard by August 10th.

The completion of these skills will ensure that you are ready to take on Second Grade Math and is required.

Your teacher will check the completion of these skills on August 10th for a Math Grade!

Additionally, though not required, you may play games and practice other skills within the IXL program.

Should you need assistance or have questions, please contact Mrs. Carpenter (ccarpenter@saintmary.org).
