

Revimax R03

R03 pattern is designed for professional track and tunners. With accurate handling and strong grip, it will offer driver excellent driving experience.

- Broad vertical groove design effectively enhances lateral skid prevention capacity.
- Straight rib in the tread center guarantees straight motion stability.
- V-shape directional groove helps drainage and the shortening of braking distance, providing excellent grip under harsh road conditions and enhancing safety performance.
- Solid pattern block on the shoulder ensures quick reaction and stability during turning, improving movement performance.
