

EQM 365 Rental

Serving

Equipment Rental Industry Verticals

Rental Management

The Rental functions are fully Integrated with Sales, Service, and Financials. One system, one user interface. Handle serialized, high value, and bulk items. Full Utilization reporting with Asset tracking and Depreciation.

Key Functions

User Dashboards for easy Navigation; Integration with Microsoft Office: Built in CRM or use MSCRM or Salesforce. Dispatching, Mobile, Service, Sales and Rentals. Full project reporting. Embedded analytics. Multiple pricing algorithms.

Operations

You can Dispatch deliveries, pick-ups, and assign Drivers and Service Personnel. Turn Quotes to Contracts and handle the most complex pricing and Billing algorithms. Use the Availability Calendar to better manage assets at multiple locations. Manage Resources and Union Wage Rules for multiple Projects.

*If Rentals are a major source of revenue,
then you NEED EQM the Equipment
Rental Management Solution...
Don't settle for less!*

EQM utilizes the logic and proven technology of Microsoft Dynamics, the underlying ERP software used worldwide daily by over 2,000,000 users at 200,000+ companies in over 50 countries. Running on the Microsoft SQL database, EQM can scale to over 1000 users. Integrates with specialized construction, project management, Job / Costing, Crew scheduling and mobile systems.

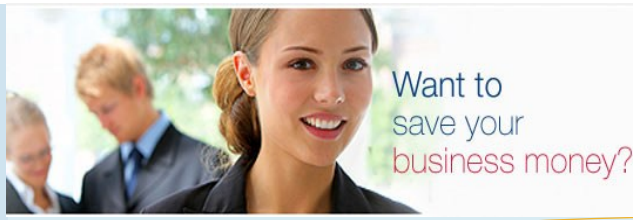

- Designed to provide the user with the latest Dashboard interface.
- EQM is a single software system that handles all your Rental, Sales, Service, Project, and Financial requirements.
- Handle high value serialized assets, bulk items and supplies, labor, delivery and pick-up charges, outside processing, sub-rentals and re-rents..
- The Availability Calendar lets you know exactly where your inventory is and what is available. Get full Utilization reporting so you will know what's making money and what's not.
- EQM enables you to assemble or sell Kits. This is particularly important when you rent a high value or serialized item that needs to be delivered with supplies.. All costs and Inventory levels are automatically tracked.

your Bankers with the financial
reporting they need in order to
help you grow your business.

Proven Worldwide

**EQM 365 Rental &
Microsoft Dynamics 365
Business Central**

*Both used worldwide for
decades*

EQM lets you manage your rentals and sales for maximum profit. Assets that have lived their useful life can be sold off. Track all your service costs for parts and labor, so you can know your true profit levels. Project tracking gives you the net profit for all jobs, major installations, large accounts and partnership programs.

EQM provides the users with easy navigation through the use of a Dashboard interface. Utilizing a 3 tier architecture, EQM's web services layer enables easier integration with other sub-systems, such as Mobile and Web based Applications like time entry, resource scheduling, field service, your website and shopping cart. Integration with Microsoft Office means easier user adoption, less key strokes, and higher productivity. Excel and SQL reporting services means better Executive visibility over the business operations and project deadlines.
