

University of Louisiana Monroe DREAMS Program

A Success Intervention Program for Middle School Students

Sponsor Packet

Dear Potential Sponsor,

Please consider supporting for the DREAMS Intervention Program at the University of Louisiana Monroe. DREAMS is a three-year curriculum-based mentorship program that encompasses a student's holistic development. It is introduced to 6th graders and continues through their 7th and 8th grade years. ULM college students serve as mentors and community members serve as seniors mentors. The program is implemented through a five-day summer camp and three quarterly Saturday follow-up one day camps. All activities are completely free for the students to participate.

ABOUT THE DREAMS INTERVENTION PROGRAM

The program is designed to instill intrinsic motivational dynamics and life-orientation by setting academic, personal, and career goals, identifying participants' talents and challenges, teaching responsibility and accountability, bringing about emotional and mental awareness, and more. The first year concentrates on personal development aspects, such as self-concept, self-worth, attitude, confidence, creativity, time, talents, and goal setting. The second year focuses on interpersonal aspects to build healthy relationships with environmental and social factors, such as family, school, community, values, and ethics. The third year focuses on leadership and becoming authentic leaders and change agents for society by focusing on problem-solving, decision-making, communication, and time-energy management skills.
