

## ABOUT EUROSCIENTIST

[EuroScientist](#) is the online publication of [EuroScience](#), the European Association for the Advancement of Science and Technology, which promotes its members as important actors for science in Europe.

We encourage science communication and dialogue on science with and for society, with a focus on issues at the interface between science, science policy and society in Europe. The webzine also aims to showcase scientific advances and contributes to scientific debate on topics related to innovation and the scientific workforce (such as inclusivity, work-life balance and career advice). We publish articles, opinions, podcasts and expert perspectives.

We welcome your suggestions for guest articles from community members on topics that you feel should be brought to the attention of the rest of the community. You may also make suggestions for topics of articles you would like to read about in the magazine.

## OUR VISION

Our vision is to ensure that [EuroScientist](#) reflects the diversity of voices of scientists and those working in fields related to science and on matters related to research. Our motto is: ***“European science conversations by the community, for the community.”***

EuroScientist is a webzine designed to enable members of the European science community and others, including policy makers, to share opinions and perspectives on current issues. It also aims, to a large extent, at furthering the debate on topical issues.

## CONTRIBUTORS

If you are passionate about issues related to science policy, scholarly publishing, science careers, innovation, ethics and the role of science in society, EuroScientist wants to hear from you.

We accept submissions of opinion pieces in English. Typically, these are about 500 to 1000 words long. We recommend using hyperlinks to the relevant web page to provide more in-depth details and give the reader an opportunity to read background documentation in any European language.

If you are unsure about the format in which you should submit or about the topic of your opinion piece, please contact: [euromscientisteditor@euroscience.org](mailto:euromscientisteditor@euroscience.org).

EuroScientist is keen to receive opinion pieces from anywhere in the world, as we want to stimulate a global debate in relation to issues affecting the science community and society.

Now, it is your turn, do get in touch and share your views!

# POLICY MAKERS

EuroScientist has a great interest in policy making. Hence, we love sharing the views of those involved with our global audience, to get the debate going on topical issues relevant to society and having a connection to science.

We are particularly interested in the views of policy makers working at the interface between science and society.

## GUIDELINES FOR WRITING ARTICLES ON EUROSCIENTIST

On EuroScientist we publish articles related to:

- Science policy
- Funding
- Science in society
- Science communication
- Scientists' career
- Responsible research and innovation
- Ethics
- Scientists' lifestyle

Structure of the articles:

- The article should be between 500 and 1,000 words
- if possible, as much as in a "journalistic" style, using subheadings, the active voice, transition words, short sentences, simple words and illustrations
- You can provide us with a main illustration (>600px-wide, landscape format that you have the right to use) otherwise we will look for a suitable one
- The abstract should be about 100 words
- a list of keywords should be provided
- at the end of the article, there can be one or several questions to call readers to comment on the article

## SPONSORED ARTICLES

**Sponsor EuroScientist, support debates at the interface between society and science and bring visibility to your organisation or project**

Participatory magazines such as EuroScientist facilitate the sharing of views among community members. This gives our community a platform to debate topical issues beyond the established media. Such pan-European debate is not only healthy, but it is essential for shaping tomorrow's world.

Should you like to provide content to EuroScientist, to bring your topics of interest to the debate and to promote your institution to a large audience, send us your suggestion of sponsored post.

The sponsored post could be for example a call for an award application, a presentation of your new project, an invitation to an event or anything which is related to what we do at EuroScientist.

### **Benefits**

Your article will be published on our website [www.euroscientist.com](http://www.euroscientist.com) visited by around 10,000 people monthly. In addition to that, it will be broadcasted to our 37,000+ newsletter subscribers. For an additional fee it can be shared on EuroScientist social media to our thousands of followers.

The name, logo and link to your company will be visible at the very beginning of the posts, in addition to potential links within the article.

### **Conditions and fee**

Every sponsored post request will be considered, and EuroScientist Editorial Board will reject or accept it according to the following conditions:

1. The article should be as much as possible a journalistic article and not only promotional or advertising content.
2. The topic should be in line with EuroScientist's readers interests and fits within our eight main focuses: science policy, funding, science in society, scientists' careers, responsible science, ethics, innovation and scientists' lifestyle.
3. The article needs to be in line with EuroScience's [ethics charter](#).
4. Every sponsored post will be charged €300 for publishing on our website and 500€ for publishing on the website and social media posts.

Do not hesitate to contact us and share your views at [euroscientisteditor@euroscience.org](mailto:euroscientisteditor@euroscience.org)!
