ADJUSTABLE TABLES

Solu-Tables

Adjustable tables

The Solu-Tables are designed with ease of use in mind. Their sliding system makes adjusting the trays effortless and safe, providing great stability when sliding with a food tray on top. Thanks to the levelers on each leg, leveling the table is a breeze and leaves no marks on the floor. The base is made of rectangular tubes to reduce trip hazards and provide optimal clearance for the resident's feet.

The concave-shaped trays allow wheelchairs to get very close to the table, maximizing space for food service. The leg is designed to offer additional clearance between the floor and the base, making floor cleaning easier. A hidden wheel helps staff move the table with minimal effort and risk of injury.

Resistant, stable and safe tables

For over 30 years, LPA Medical has been manufacturing medical equipment designed to help people experiencing autonomy loss. Entirely made in Quebec, our dining room tables help facilitate the work of nursing staff as well as the comfort of residents.
