Slings accessories

Ceiling hoists

Molift ceiling hoists and Molift Rail System are the optimal solutions to assist caregivers. The hoists are intuitive and safe to use and can solve all hoisting needs, while increasing caregiver and user comfort and safety.

Molift Air

A flexible ceiling hoist for better working situations and reduced strenuous lifting

Dignified quality of care

Molift Air is a smart and user-friendly family of ceiling hoists, with outstanding lifting capacity, 200 to 500 kg. Suitable for sitting, horizontal movements, standing and walking training situations in all care environments and gives the user good and dignified quality of care. Great flexibility is offered, with eliminated strenuous manual lifting and a better work situation for caregivers.

Easy handling & low service costs

With the Molift Rail System and a wide range of accessories, this is a complete, flexible system. Can be used with fixed ceiling rails or portable freestanding systems. The smooth handling is a great advantage and thanks to the low weight and the smart quick release coupling, the hoist is easy to remove during installation and service. Molift Air is optimised for long lifetime and low service costs. It can be easily adapted to other manufacturers' rail systems on the market.

Features

- Small hoist - great lifting capacity
- Silent, soft operation and easy to use
- Flexible solutions and a wide range of variants
- Long lifetime and low lifecycle cost

Molift Nomad

A portable low weight hoist with integrated sling bar, suitable for all day-to-day operations.

Low weight - high hoisting capacity

The weight of the Molift Nomad is only 6.8 kg. Despite the low weight it has a hoisting capacity up to 255 kg. Molift Nomad has a unique, curved design and the integrated 4-point sling bar, used with any Molift sling, provides the user with a comfortable and spacious position. Molift Nomad is equipped with numerous safety features such as electronic overload protection, electrical emergency lowering and emergency stop.

Easy room-to-room transfer

Molift Nomad has integrated carry handles for easy handling. The connection is easy and no tools are required. In combination with the specially designed trolley, Molift Nomad can be used to climb from one rail system to another without a transition rail. This results in easy transfer from room to room. By using Molift Nomad Extension Arm the hoist can easily be connected and disconnected to the trolley from the floor. Molift Nomad Cart is ideal for storing and transporting the hoist.

Features

- Low weight and high hoisting capacity.
- Portable ceiling hoist.
- Climbing room to room.
- Easy connection without tools to trolley.
- Integrated 4-point sling bar.

Molift Rail System

A cost-effective and flexible solution for all environments

Efficient installation process

Molift Rail System has rail profiles with innovative solutions for integration into all types of ceilings and walls. The wide range of fixing options results in making it one of the most most efficient installation processes in the market. It is easily integrated and is aesthetically adjusted to the design and architecture of the room. The range of switches and other transition options makes the rail system extremely flexible.

Customised capacity

Depending on the different needs and choice of the hoist motor, the Molift Rail System can be constructed from 160 up to 500 kg.

Cost effective solutions

The efficient installation process, the flexibility and the many features make Molift Rail System a cost-effective, competitive and smart investment for hospitals, institutions and the home. This helps create a practical and efficient workplace for nurses and caregivers, as well as an attractive environment for patients and visitors.

Traverse rail system

One of the most flexible solutions on the market, covering all needs of hoisting, regardless of renewal or equipment changes in the room.

Traverse coupling

Enables two different rail systems to be connected, for example between a traverse system and a single rail. Very useful for transfers from one room to another.

Single rail system

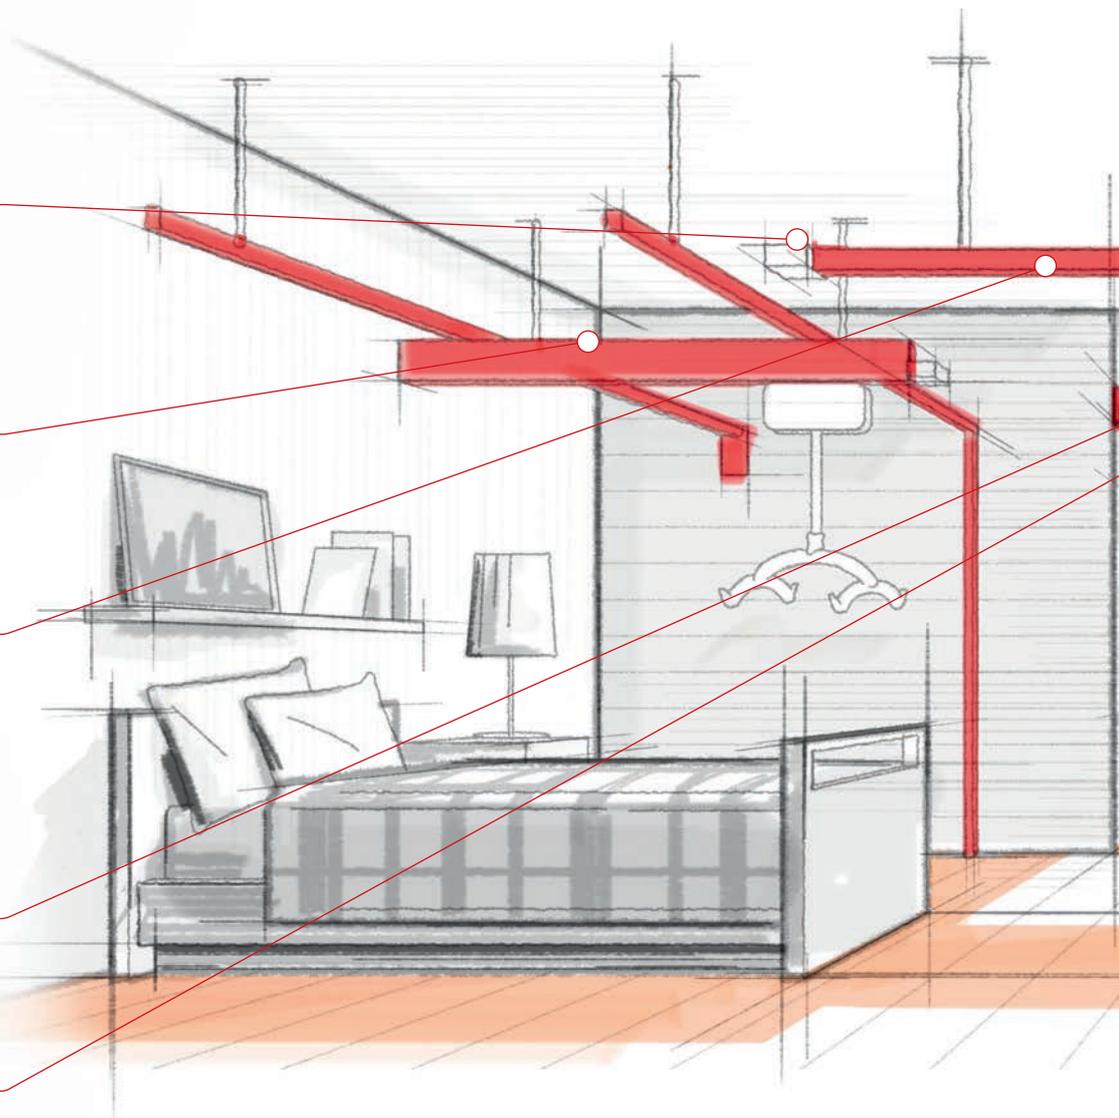

Straight rail and/or curve rails give a simple and effective patient transfer for the most common lifting situations such as bed-to-wheelchair hoisting.

Room to room transfer

When transfer is needed from one room to another or from one rail system to the next system, Molift can provide Room to Room function (Climbing), switch systems or continuing rail systems through doorways etc.

Rail Switch

Rail Switch - enables a change of direction of single rails, for example from a straight rail to a curve rail.

Flexible system

- Easy to install
- Various weight classes
- A variety of installation options – integrated in, or under the false ceiling, on the wall, on the floor with upright supports, etc
- Can be installed in all types of ceilings, walls and floors

Possibilities

Straight profiles
 Curves - 30, 45, 60 and 90 degrees
 Fixed brackets, telescope brackets
 Flexible traverse options
 Traverse switch
 Rail switch
 In-rail charging
 Curtain pass through

Maximum user weight (SWL)

160 - 500 kg

Colours

White

Rails

3 dimensions:
 Height: 62, 112, 142 mm

Max distance between fixtures

Up to 6000 mm

Switches

Rail switch
 Traverse switch

In-rail charging

In rail charging allows the hoist to charge batteries automatically anywhere in the system. This way the hoist is always ready for operation. In-rail charging can be mounted in straight rail and traverse rail systems only.

Integrated rail

Integrated Rail System - a single integrated rail offers a very discrete and clean solution.

Curtain pass through

Curtain pass through allows gaps for curtains mounted in the ceiling of the ward. This means several beds can share one motor, and still maintain privacy when individual nursing is required.

Wall mounted rails

Wall mounted rails - if the ceiling cannot support the system, it is possible to mount the rail on the wall.

Molift Duo

A flexible and free standing gantry system for temporary hoist situations

Easy solution for most room sizes

Molift Duo offers a system that is easy to install without being fixed to the ceiling or walls. It is ideally suited for temporary hoist applications in hospitals, nursing homes or private homes. In combination with Molift Air or Molift Nomad hoist and a sling, Molift Duo solves most overhead lifting situations, whatever the environment. With a lifting capacity of 300 kg, it is ideal for lifting and transferring a person from or to; bed, floor, chair, wheelchair, toilet etc.

Lightweight construction

Molift Duo has a lightweight aluminium construction and a functional design which makes the gantry system easy to install, dismantle and move elsewhere.

This 2-post gantry system has a rail length between 2000 mm and 3500 mm and has 4 step adjustable heights up to 2550 mm, making this free standing hoist unit suitable for all bed and room sizes.

Features

- Easy to install - due to the lightweight system, it is easy to install the gantry and move it to a new location.
- Supreme stability - the gantry system has supreme stability and a functional design.
- Adjustable height - height positions can be set at four fixed positions from 225 cm up to 255 cm. Adjust the height with the quick release pin.
- Charging of lift motor - Molift hoist motors can easily be charged through the hand control or optionally through in-rail charging.

Molift Quattro

The temporary hoist solution with excellent stability

A free-standing traverse gantry

Molift Quattro is a free-standing hoist unit that offers a (four post) Traverse System which is the best solution for temporary hoisting needs or when the facility is not built for fixed installations. The gantry is easy to install without the need to mount additional fixtures on walls or ceilings. It is ideally suited for temporary hoist applications in nursing or private homes.

For overhead lifting situations

The traverse has a lightweight aluminium frame and four steel posts that provides excellent stability and covers the surface of the hoisting requirement. Molift Quattro solves all overhead lifting situations together with the Molift Air or Molift Nomad hoist motor and a sling. With a lifting capacity of max 300 kg, it is ideal for lifting and transferring a person from or to bed, floor, chair, wheelchair, toilet etc.

Features

- Easy to install - designed for quick installation by two persons (preferably).
- No wall or ceiling mounting is required.
- Supreme stability and manoeuvrability .
- Easy to charge - the hoist motor can easily be charged through the hand control or through the in-rail charging option.

Mobile hoists

Molift mobile hoists are well known for many innovative and intuitive solutions such as the 4-point sling bar, integrated service software, a compact lightweight design and ergonomic, user friendly push handles.

Molift Mover

A family of compact, lightweight mobile hoists with great flexibility and large hoisting range. Suitable in homes, hospitals and care environments.

Large hoisting range

Molift Mover has a lightweight aluminium construction that makes the hoist very easy to manoeuvre. The low weight in relation to lifting capacity is best in class. A large hoisting range allows hoisting from high surfaces as well as hoisting from the floor. The integrated Molift Service Tool ensures correct service and maintenance intervals.

Ergonomic handling

For improved caregiver ergonomics, the Molift Mover hoists are equipped with Molift's unique intuitive push handle. The handle provides multiple and flexible grip possibilities for improved caregiver ergonomics. The easily accessible hand control is very user friendly.

Features

- Lightweight and compact hoists
- Very easy to manoeuvre
- Large hoisting range
- Hoisting from floor

Molift Partner 255

Vertical hoisting pattern and excellent stability for complex care situations

Ideal solution for critical care

Molift Partner 255 provides an ideal solution for hoisting in acute and critical care areas in both hospitals and care facilities. The straight vertical column in combination with the fixed sling bar provides excellent stability. It maintains the user at the same distance from the column throughout the hoisting. With an outstanding hoisting range, Molift Partner 255 allows hoisting from the floor as well as high surfaces.

Molift Partner 255 is one of the lightest in its category and combined with excellent construction, ergonomic design and the castor solution, it becomes very easy to manoeuvre even with a lifting capacity of 255 kg.

Molift Partner 255 is available in several variants for the possibility of optimising the product according to needs; low base chassis, supporting arms for gait/walk training and weight scale.

Features

- High safe working load - 255 kg
- Fixed sling bar and straight vertical column for safe and stable hoisting
- Low weight and easy to manoeuvre
- Suitable for use with Molift stretcher

Molift Service Tool

The intelligent software that interacts with the hoist

Ensure correct service and maintenance

All hoists from Molift come with the integrated Molift Service Tool, a software that records the usage and service history of the hoist and gives a warning indication when service is required. The software allows a certified technician to connect and interact with the hoist, for instance, to see and print the service history and perform service and technical troubleshooting. Service documents like periodic inspections and service checklists are stored directly in the software to be easily available for the technician.

Analyse hoist usage

With the Molift Service Tool the user can see when the hoist was produced and how many lifts have been performed during its lifetime. The software displays the number of hoists according to a unique weight class definition, and use this to calculate the number of standard lifts. By not calculating all lifts as identical the service interval of the hoist is prolonged, which increase the service efficiency and lower the product's lifetime maintenance cost.

Set key parameters

Through the Molift Service Tool, the key parameters can be set for each unique hoist, for instance, adjusting the Safe Working Load (SWL). This enables setting the SWL of a specific ceiling hoist to match the rail system, sling bar or sling it is combined with, ensuring safety by not risking that the lowest SWL of the overall lifting system is exceeded.

Sit-to-stand aids

Molift's sit-to-stand aids are based on the same ergonomic principles. The products imitate the natural pattern of movement and fulfill the transfer needs of users with some weight bearing capacity.

Etac Turner Pro

Encourages a natural standing movement and minimizes the risk of injury

Encourages natural movement

Etac Turner Pro is a turn aid with an intuitive design that offers safe patient turning with standing support. This turn aid enables a good posture and minimises the risk of injury for the caregiver when transferring.

Etac Turner Pro encourages natural standing and sitting movement for the user. The only adjustments needed is the height of the leg support and the handle. After that, the transfer can be carried out safely while the caregiver and the user maintain eye contact and communication.

The orange handle provides an intense, high contrasting colour which can help users with impaired vision or dementia. The small-scale footplate makes it the perfect choice of transfer aid when transferring in narrow spaces.

Etac Turner Pro is compact and easy to grip, and due to its low weight of only 8 kg, it is easy to bring along.

Features

- Compact and easy to transport.
- Soft, comfortable leg support with lateral support follows the movement from sitting to standing.
- The handle offers many grip possibilities and has an orange contrasting colour that helps users with impaired vision or dementia
- Very easy to turn and move indoors on different floors and carpets

Molift Raiser Pro

The ergonomic platform for a safe and active sit-to-stand transfer

Early mobilization and rehabilitation

Molift Raiser Pro allows the user to use their own muscle power during a transfer. The natural movement pattern stimulated and the ergonomic design makes the user feel safe during the transfer. Molift Raiser Pro helps the user to rehabilitate in all health environments during every transfer so that mobilization can begin early, already in the intensive care unit.

The stability and maneuverability make Molift Raiser Pro ideal in confined spaces, such as toilets. The sit-to-stand aid ensures safe, active standing support during short transfers, such as between beds and wheelchairs/ shower chairs. When transferring a user, the caregiver gets assistance with a minimum risk of injury.

Features

- A versatile handle with a soft warm feeling, with an optimal grip for both the user and the caregiver.
- The handle has two different fixing heights for accessories.
- Soft padded legrest with side support, height adjustable with only one hand.
- A central brake mechanism with a one-foot touch that gives audible feedback when activated.
- Low step-on height of 35 mm.

Molift Transfer Pro

Empowering mobility through enhanced seated transfers

Enhancing seated transfers

A transfer is crucial for patient rehabilitation and maintaining physical abilities. Molift Transfer Pro ensures a safe and healthy environment for both patients and caregivers.

Molift Transfer Pro is a sit-to-stand device designed for seated transfers between bed, wheelchair, or toilet. It is suitable for users who can follow instructions, lift their weight, and maintain core stability. It is ideal for hospitals, institutions, and home care.

The ergonomic handle allows multiple grip options, making it user-friendly. Stable seat pads and soft padded leg support provide comfort, while the low step-in height and sloped edge ensure easy foot placement. Adjustable leg width and close approach design enhance the transfer experience.

Features

- Multiple grip handle - A versatile, ergonomic handle offering several grip options for both caregiver and user.
- Central brake - The intuitive one-foot-touch central brake locks both wheels.
- Seat pads - The stable seat pads enhance a safe and comfortable transfer.
- Turning radius - High-quality wheels for exceptionally easy manoeuvring.

Molift Quick Raiser 1 & 2

Compact and stable with small turning radius and excellent manoeuvrability

Stable and easy to manoeuvre

Molift Quick Raiser 1 and 2 are powerful, but despite their compact design and lightweight, they are stable and easy to manoeuvre. The base's unique wheel position and perfect weight distribution provide a small turning radius with easy manoeuvrability even in tight spaces.

Both have a low base, which makes them fit well around toilets and under most beds, chairs and wheelchairs. Molift Quick Raiser 2 additionally has adjustable legs, enabling accessibility almost everywhere.

Features

- Low base with narrow front for easy access under beds and chairs.
- Adjustable knee pads that can be turned around for better fitting and alternative support for the legs.
- Small turning radius with easy manoeuvrability even in narrow spaces.
- Integrated battery indicator providing audio and visual notification.

Molift Quick Raiser 205

An ergonomic sit-to-stand hoist with outstanding lifting capacity

Stable, safe and compact

Molift Quick Raiser 205 is a state of the art sit-to-stand hoist, with an electrically adjustable leg base. The hoist is comfortable, stable and safe with exceptional manoeuvrability. The hoisting of Molift Quick Raiser 205 imitates the natural pattern of movement and fulfils the transfer needs of users with some weight bearing capacity.

The unique wheel position, angled push bar and the extraordinary weight distribution of the base, provides a small turning radius. With the small castor option, it fits under most beds and chairs while the electrically adjustable legs enable accessibility almost everywhere. The fixed-leg option enables a very small footprint.

Features

- Ergonomic design - the inclined column encourages a natural pattern of movement.
- Active 4-point lifting arm - provides, together with RgoSling Active, extra support when hoisting from sit-to-stand.
- Easy to operate in moving and handling situations; toilet, sit-to-stand and stand-up training.
- Automatic warning for periodic inspection and service.

Molift RgoSling Active & StandUp

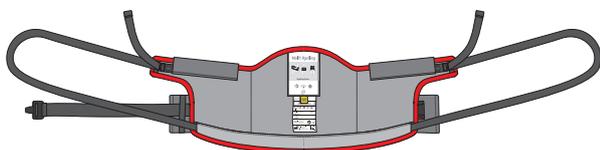

Ideal slings for active transfers with Molift Quick Raiser

Comfortable and easy transfer

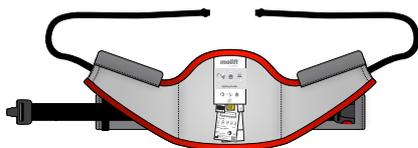

Molift sit-to-stand slings are padded and developed for active hoisting together with Molift Quick Raiser. The slings provide perfect lumbar support and are the ideal solution for hoisting and moving between different sitting positions. The slings have an efficient anti-slip lining to prevent the sling from sliding up. The waist belt provides additional support and stability.

Molift RgoSling Active is designed for a 4-point lifting arm (Quick Raiser 205) and has sliding loops for the possibility to an optimal posture during the sit-to-stand movement. Molift RgoSling Active provides additional grip and support around the hips when standing. The wide back-support distributes weight and pressure evenly over a large surface, which makes it very comfortable for the user.

Molift RgoSling StandUp is designed for a 2-point lifting arm. It is quickly and easily placed around the user. By virtue of the design it is ideal for use in toilet situations.

Molift RgoSling Active

Molift RgoSling StandUp

Features

- Perfect solution for hoisting and moving between different sitting positions
- Self-adjusting sliding loops (RgoSling Active)
- Large and firm support

Molift RgoSling

Molift RgoSling is available in a wide range of models and sizes that ensure a suitable sling, regardless of the user's needs. Molift RgoSlings are designed for a 4-point lifting bar.

Sliding loops

Sliding loops on head straps. Making a smooth transfer from lying to sitting position. Ensures a comfortable and safe position for the patient.

Colour coding

Colour coding of hoisting loops helps you find the right fit.

Comfortable padding

Padding in back and leg support distributes the weight over a larger area, making the sling more comfortable for the user.

Labelling

Clear, practical information on a highly visible label. Washing instructions and technical information are found in a protective pocket at the back.

Guide straps

Guide straps assist with positioning during the lifting process.

Application pocket

Pockets in the back and on the leg supports make application easier.

Molift RgoSling

Molift has a long history of manufacturing high quality hoists and slings. Molift RgoSling is a portfolio of 4-point slings developed to meet the demands for the everyday needs in healthcare.

Standard models: HighBack and MediumBack

Our standard models are designed for all usual transfer situations and are suitable for most users. The standard models are available in two back heights: HighBack and MediumBack. The padded version has polyester fabric with padded back and leg rests, and the net version has polyester net with padded leg rests.

Models with specific features

We know that users have many different requirements, so we've designed additional models with specific features to meet their needs, including the Molift RgoSling Toilet and Molift RgoSling Amputee.

Molift RgoSling HighBack

Standard leg support opening

- Sliding loops on head straps
- Support for the entire back and the head
- Hoisting to and from a lying or a sitting position
- All-round sling that fits most users
- Hoisting from floor

Molift RgoSling MediumBack

Standard leg support opening

- Sliding loops on head straps
- Suitable for a user with headcontrol
- All-round sling that fits most users
- Adjust the sitting angle by the leg straps

Molift UnoSling

Disposable slings for single-patient use. An effective solution for infection prevention. Molift UnoSlings are designed to fit a 2-point or a 4-point sling bar.

Non-wash label

The symbol will change appearance if the product is accidentally washed.

2-point or 4-point

Suitable for use with either 2-point or 4-point sling bar.

Disposable for single-patient use

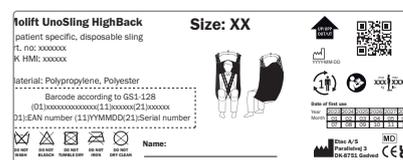

To prevent the transmission of infections, the sling is disposed of when soiled, or the patient no longer needs it.

Disposable product supplied in practical packaging, which makes it easy to store and take out a new sling when needed.

Label with user's name

All products have a large, clear label with practical information. The size is shown clearly and it is easy to add the user's name and date of first use, which ensures safe use.

Molift UnoSling

UnoSling is a portfolio of single-patient use slings (SPU), developed to meet the growing need in healthcare institutions, where infection risk prevention is of utmost importance.

Benefits of single patient use products

Molift UnoSling stay with the patient throughout their stay at the facility and are disposed when they become dirty or damaged or when the patient leaves the facility.

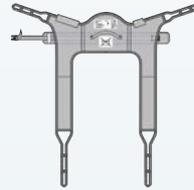

SPU products are essential to prevent healthcare-associated infections. This also enables cost savings and contributes to a more efficient operation for the facility by avoiding logistics and laundry costs. It also leads to easier storage of products that are always ready for use.

Models with specific features

Although being disposable products, Molift UnoSlings are still designed with high quality and patient comfort and safety in mind. Several models are available to meet the different requirements of users, for instance UnoSling HighBack, UnoSling Toilet, UnoSling Repositioning Sheet, UnoSling Ambulating Vest and UnoSling LimbLift.

Slings facts

Materials

Polyester

The standard polyester fabric is durable and hard wearing. The material is easy to maintain and has a dirt repellent surface.

Polyester net

Hard wearing and durable soft net fabric, breathes well and dries quickly. Suitable for shower and bathing situations.

Durable polyester

Extra strong durable polyester fabric for products with a weight limit of up to 500 kg. The material is easy to maintain and dries quickly.

Non-woven

Non-woven polypropylene. Applies to all Molift UnoSling slings for single-patient use. Molift UnoSling Repositioning Sheet is an exception made of polyester/cotton.

Size	Recommended user weight		Washing instructions
	EvoSling & RgoSling	UnoSling	
XXS	12 - 17 kg	-	<p>All UnoSlings are disposable and should not be washed.</p> <p>Washing temperature 60-85°C / 140-185°F Washing at higher temperatures wears out the material faster.</p> <p>All slings except Molift UnoSlings, have a maximum user weight of 300 kg. Exceptions are specified under each product.</p>

XL	160 - 240 kg	160 - 350 kg	
XXL	230 - 350 kg	-	

Slings accessories

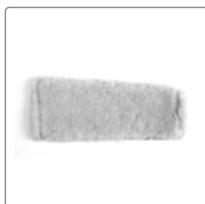

Molift EvoSling Support

Accessories for slings without head support
The head support is attached to the sling and its length can be adjusted as required using the plastic buckle. It gives the user support for the head and is a useful addition when the user requires more support.

Molift EvoSling Extension Loops

Straps for easier adjustment
Used to extend the hoisting straps or to keep the leg supports together.
N.B: Order 2 for a pair.

Molift EvoSling Soft Padding

For pressure-sensitive users
EvoSling Soft Padding consists of pressure-relieving padded sleeves which are slipped over the leg parts of slings with split-leg support. Washing 40 °C / 104 °F.

Molift Strap Marker

For marking a selected hoisting loop for head or leg support hoisting straps. Mark the hoisting loops selected during individual testing of the sling.

Molift RgoSling Extension Loops

Straps for easier adjustment
RgoSling: Used to extend the hoisting straps, flexible for 3 different length.
N:B: Order 2 for a pair.

Immedia SlingOn

When the user can't be turned onto their side
Immedia SlingOn used with a folding technique makes it possible to apply the sling without first turning the user over to the side.
Washing in 80 °C or 176 °F.
