Consultation

Every job begins with a FREE in-home design consultation. One of our professional designers will meet with you at your home to evaluate your space and understand your unique needs.

Estimate

Using our proprietary 3D design software, our designer will collaborate with you during the FREE in-home design consultation to create a custom solution for your project. We will provide you with an estimate at or shortly after your in-home meeting.

Installation

Our professional installers are passionate about providing excellent service. We expertly install each job to exceed your expectations and clean the work site upon completion.

Our Guarantee

Our manufacturer offers a lifetime warranty on all wood products. If a product ever fails during normal use, we will replace it free of charge. Period.

A photograph of a modern kitchen interior. The focus is on a stainless steel refrigerator with a double-door design, set against dark wood cabinetry. The cabinetry has vertical silver handles. The floor is covered in a light-colored carpet. The lighting is soft and even.

Design
& Organization

Metallic: Pewter cabinets (shown above) with an inset workbench provide ample storage in your garage. Also available in Bronze and Silver.

Classic & Clean

Standard Finishes

Cabinet finishes and color can define your space. Whether you want to make a statement or simply match your existing decor, your design consultant will help you choose a look that is right for you. Finishes include metallic, wood grain, solid and powder coated.

Wood grain: Coco cabinets (shown above) create a fresh, modern feel and offer a smooth transition into your home. Also available in Maple.

Solid: White cabinets (shown left) provide a classic and clean look. Solid finished cabinets are also available in Slate.

— Powder Coated Finishes —

Innovative powder coated cabinets provide contemporary styling with high tech design. Available in Red (shown above) and Granite (shown below), powder coated cabinets are the most durable and environment resistant cabinets in the market today.

Our $\frac{3}{4}$ inch thick cabinet construction is made using commercial grade, materials. Choose from nine colors and four finishes or combine styles for a truly unique look.

Product Highlights

Cabinet Access: Full-swing door hinges allow doors to open wide for easy access. Additionally, cabinets can be constructed without a center dividing post to provide unobstructed access to the entire shelf width and allow for storage of larger objects (shown right).

Shelving: One-inch fixed and adjustable shelving is 25 percent thicker than the industry standard and has a load-bearing capacity of 100 pounds.

Custom Sizing: A wide variety of cabinet heights, depths and widths allows for endless design possibilities and customization (shown left.) Extra deep cabinets have enough room to fit large storage bins on a shelf, doubling the capacity of the competitors' cabinets.

Drawers: All drawers include full-extension runners for easy access to all of your stored items (shown left).

Backing: All garage cabinets are installed with full ¼ inch backing. Full backing strengthens the cabinets and eliminates gaps which could otherwise provide points of entry for dust and insects.

With an endless amount of possibilities your garage can transform into the dream space you've always wanted. Call us today to set up a FREE in-home design consultation.

Product Highlights

Wall-Mounted Cabinets: To protect your belongings from water, debris and pests, all of our cabinets are securely anchored directly to the garage wall to create a “floating” cabinet.

This design also allows you to easily sweep under the cabinets and hose down your garage floor without risk of damaging your cabinets.

Sliding Doors: Innovative sliding door systems provide easy access to belongings without the need to move a parked vehicle. This dual sliding track door is particularly useful for spaces lacking adequate room for swinging doors.

Countertops

Whether your passion is gardening or auto repair, woodworking or model planes, we will create a custom workbench perfect for your favorite pastime. The key to any great work space is the countertop - choose from Stainless Steel, Butcher Block, Ebony Star or Milano Quartz Laminate.

Stainless Steel: Stainless steel countertops add a modern industrial feel to the garage. Stainless steel is a non-porous and stain-resistant material that is also incredibly durable. This countertop blends harmoniously with many different colors and materials, making it a good fit for your own unique design.

Butcher Block: Originally used in butcher shops for cutting meats, the butcher block has evolved into a beautiful yet practical multi-purpose work surface. Warm and naturally beautiful, butcher block countertops add character to your garage.

Laminate: Affordable and easy to maintain, the Ebony Star (shown left) and Milano Quartz (shown right) countertops are smart options for any garage. With two easy to coordinate colors this countertop is accented by a thick, rounded-edge banding that provides extra durability to your workbench.

Storage Systems

Garage storage has always been a problem. Our complete line of storage and organization systems provide the most effective solution. With overhead storage racks and two different wall system options, garage organization and storage has never been so simple.

Gridwall: Constructed of commercial grade steel, the Gridwall system is designed to last. Gridwall sections mount securely to the wall allowing you to maximize your storage needs in even the smallest spaces.

Keep the garage clean by hanging everything from power tools to bicycles on the wall. We offer two modular, wall-mounted organization products with interchangeable accessories: Slatwall and Gridwall.

Slatwall: Durable PVC Slatwall panels are cut to fit your individual space. Impervious to water, Slatwall will not chip, warp or flake. Use as a complete wall covering or as a complement to your existing home storage, Slatwall allows a flexible layout that easily adapts to your changing storage needs. Available in Maple, White, Taupe, Gray and Black.

Garage Accessories

Your storage configurations are nearly endless with our extensive selection of accessories. Designed to simply snap onto either Gridwall or Slatwall panels without tools, our accessories can be easily rearranged to make storing anything from sports equipment to tools quick and easy.

Accessories: Accessories simply snap onto the Slatwall or Gridwall panels without tools and can easily be rearranged as your storage needs change. We offer an extensive selection of accessories including durable hooks, shelves, tilt bins, wire baskets, tool holders, sport racks and more.

Overhead Storage Racks: Our ceiling storage units have the highest weight capacities of any overhead racks on the market. Ceiling racks are perfect for storing seasonal items and less frequently used bulky items.
