Special Announcement from the Lakeland Power Co-op Board of Directors

In a world of rising costs, the Lakeland Power Co-op Board of Directors are pleased to announce that a moratorium has been placed on the \$5.50 Deposit Reserve (DR) Tariff and the \$5.50 Brushing Tariff, effective October 1, 2025.

Lakeland Power Co-op sets its Distribution Tariff (DT) based on breaker sizes to cover the operations and maintenance of your electrical system. The current DT was established in 2010 and has not changed since that time. To ensure transparency with the membership, the Board introduced the Deposit Reserve (\$15) and Brushing (\$20) Tariffs to help cover the costs of these specific services.

In 2013, both tariffs were reduced to \$5.50 for each service.

As a cooperative, the Board listens carefully to its members and values the feedback and input we receive. After thoughtful consideration, the Board believes that the Co-op is in a strong financial position to pass these savings on to its members, and this moratorium reflects that commitment.

This decision highlights one of the key benefits of being part of a cooperative — members working together for mutual benefit.

The Board will continue to monitor these expenditures moving forward, as brushing and pole replacement remain essential components of maintaining a safe and reliable electrical distribution system.

Food Bank Donations Needed

Currently local Food Banks are struggling with low levels of food. If you can help out by making a donation of non perishable food, hygiene products or monetary, it would be greatly appreciated. LPC has a donation bin located in our office.

Daylight Savings Time Ends

A reminder to members to “Fall Back” with the coming time change!
Daylight Savings Time ends on
Sunday, November 2, 2025 at 2:00AM.

Reminder: Keep Access Clear for Linemen This Winter

As winter approaches, please ensure the area around your transformer pole remains clear of vehicles, equipment, and debris. This allows our linemen safe and efficient access to maintain or restore power in the event of an outage.

Additionally, when clearing snow, please take note of where it is being placed throughout the season. Snow should not be pushed or piled within our Right of Way areas, as this can block access to the transformer pole and power poles both in your yard and along the mainline.

Your cooperation helps our linemen work safely and restore power more quickly when needed. Thank you for your help in keeping our system reliable and accessible this winter.

**The Lakeland Power Co-op office will be closed on Tuesday, November 11, 2025
for Remembrance Day.**
