THE PROBLEM

The Digital Revolution Changed Everything

Healthy People 2030 groups the social determinants of health into five domains. None is technology.

WHY TECHNOLOGY IS THE 6TH DETERMINANT

- Healthcare Goes Digital**
Telehealth, patient portals, AI diagnostics require digital access.
- Education Requires Connectivity**
Remote learning, AI tutoring demand broadband and device access.
- Economic Mobility Is Digital**
Job apps, banking, benefits all live online. No access = no opportunity.
- AI Is Reshaping Everything**
51% of U.S. adults do not use AI chatbots (Pew Research Center, 2026). Communities must assess and leverage AI.

Take the Free TSDOH Assessment

Discover where your organization stands across all 132 variables.
