

FRAMEWORK OVERVIEW

— THE TSDOH ASSESSMENT MATRIX™

Technology as the 6th Social Determinant of Health

A proprietary framework that positions technology access, literacy, and readiness alongside the five traditional social determinants of health. The first assessment to measure what others miss.

THE PROBLEM

The Digital Revolution Changed Everything

The five traditional SDOH were defined before AI, telehealth, and remote work.

The Six Determinants

WHY TECHNOLOGY IS THE 6TH DETERMINANT

Healthcare Goes Digital

Telehealth, patient portals, AI diagnostics require digital access.

Education Requires Connectivity

Remote learning, AI tutoring demand broadband and device access.

Economic Mobility Is Digital

Job apps, banking, benefits all live online. No access = no opportunity.

AI Is Reshaping Everything

67% of Americans never used AI. Communities must assess and leverage AI.
