# The Business Case for AI Readiness

03

Why investing in technology readiness positions organizations, communities and funders for the economy that is already arriving.

Dr. Troy Nash Founder and CEO, AGI Affinity

88%

Of organizations now use AI.

THE COST OF INACTION

# The market moved. Readiness decides who benefits.

Adoption is no longer the question. Preparation is.

## WHERE THE MARKET IS

**88%** of organizations report using AI

**92M** jobs projected to be displaced by 2030

**170M** jobs projected to be created by 2030

**39%** of workers' skill sets projected to be transformed or outdated by 2030

## WHAT WAITING COSTS

**Funding** funders ask for evidence of need and readiness. No data, no case.

**Disparity** in my view, every year without AI widens gaps in healthcare, mobility and education

**Capacity** manual processes consume staff time that better tools would return

**Investment** in my view, prepared communities attract capital and unprepared ones stagnate.

**The 92 million and 170 million are the same forecast.** The World Economic Forum projects both in the Future of Jobs Report 2025. The WEF projects net growth of 78 million jobs by 2030. Preparation decides who fills the new roles and who absorbs the losses.

Stanford HAI, AI Index 2026. World Economic Forum, Future of Jobs Report 2025.

ENGAGEMENT OPTIONS

# Three ways to work with us

01 **Assess.** TSDOH evaluation and report. The 132 variable audit, a gap analysis, and a priority roadmap.

02 **Accelerate.** Everything in Assess, plus AI Boot Camp for your staff and a written implementation plan.

03 **Transform.** Everything in Accelerate, plus ongoing advisory and grant support as a continuing partnership.

04 **What every engagement delivers:** a readiness score across 132 variables, baseline metrics you can re-run, and grant ready documentation.

05 **Plus staff AI literacy training** and a measurement framework, so the work continues after we leave.

**See where you stand**
