

The Omni Containment Stainless Steel Grease Depth Gauge Comb is the ideal tool for determining exhaust system grease levels.

Using the Omni Stainless Steel comb enables kitchen exhaust system inspectors to measure how much grease has built up in the exhaust duct without the fear of the traditional comb snapping while in use.

Don't Let Grease Get out of Control

The Omni Stainless Steel Combs include markings for depths ranging from .002 to .125 inches with notations of **Acceptable**, **Cleaning Required** and **Critical Depth** as listed in the NFPA 96 2014 edition FIGURE A.11.6.2

Omni Stainless Steel Custom Grease Combs can be purchased in bulk and printed with your logo with a one-time setup fee. Contact your Omni Containment Sales Representative to receive pricing
