Compliant Technologies is a Kentucky-based veteran-owned, company that produces and sells a line of non-lethal, non-injurious products that utilizes CD3 (Conductive Distraction & De-escalation Device) Technology.

Our flagship product called The G.L.O.V.E. (Generated Low Output Voltage Emitter) is a very low optics, humane, de-escalation tool that frees up both hands. Our products have tens of thousands of real world uses with a 95% success rate and no individual injury to date! The G.L.O.V.E. offers a low-profile, low-optics design and, based on customer feedback, reduces costs associated with medical expense, worker's compensation and litigation by an average of 84%.

Our products are so **Game Changing** that we are...
"The New Protocol in Peacekeeping!"
