Compliant Technologies is a Kentucky-based veteran-owned, company that produces and sells a line of non-lethal, non-injurious products that utilizes CD3 (Conductive Distraction & De-escalation Device) Technology.

Our flagship product called The G.L.O.V.E. (Generated Low Output Voltage Emitter) is a very low optics, humane, de-escalation tool that frees up both hands. Our products have tens of thousands of real world uses with a 95% success rate and no individual injury to date!

Not only is The G.L.O.V.E. unassuming with low-optics, it helps lower injury rates by 40%.

This translates into less money spent on medical expense, worker's compensation and litigation.

Our products are so **Game Changing** that we are...

"The New Protocol in Peacekeeping!"
