

Press Release

A grassroots campaign that must urgently go viral...

‘HUMANITY FIRST!’

A Five-Year Strategy that unites people right across the political spectrum to end the Dystopian Technocracy Nightmare which is being rolled out by the fake and fear-based ‘UN Agenda 2030’

When you stop to ponder on the core human values that decent and honourable people use on a daily basis, you sadly realise that virtually all of our elected decision-makers are almost completely devoid of them. Just one look at the global leaders we have on today’s world stage, or, come to that, even our own home-grown politicians in the Houses of Parliament, you cannot fail to realise that Love, Truth, Compassion, Humility, Generosity, Kindness and Wisdom do not exist in any sort of meaningful way.

Today, Wednesday 22nd April 2026, marks [Earth Day](#). This is the day when people globally come together within their communities to do something practical that in a small but positive way supports our fragile natural world—a living world which is increasingly suffering from ruthless exploitation, ecological mismanagement, not to mention blatant corporate greed on a scale never before imagined.

The rain forests are still being destroyed; desertification continues apace; pollution in the air, rivers and oceans is still rife; and we are still losing species at an ever-increasing rate. The Earth’s biodiversity is under threat like never before. And all this whilst a sizeable percentage of the human race is forced to live in utter squalor and destitution, with vast numbers of innocent children suffering in the most appalling ways, including child labour to meet excessive corporate demand.

We are told that the human family numbers around 8.2 billion people. Unknown to the vast percentage of them, there exists in the shadows a mind-set belonging to a truly miniscule cabal of less than ten thousand self-entitled and pitiless corporate sociopaths who believe that they have the absolute right to decide on humanity’s central and ultimate destiny by taking us all down a path that is most definitely not of our choosing and which becomes ever more totalitarian by the day.

This cabal has an objective that is clearly anti-human. We are to be frightened and corralled to live in a digital prison whereby advanced, intrusive and integrated AI technologies will surveil and control every detail of our lives 24/7, whether we are in our workplaces, on the streets or in our homes... just as we see today in Communist China. The cabal ultimately seeks to create a new global hierarchy, or, to be more accurate, a hi-tech and corporate neo-feudal system that will rule the world using AI and other cutting-edge technologies. Our democracy, such as it is, is to be replaced by a [‘technocracy’](#).

Fascist by inclination, this elitist cabal would then decide who lives and prospers and who are to be classed as ‘useless eaters’ to be dealt with as these psychopaths see fit. A current frightening development is the rapid rise of the dangerous, sinister and double-edged science of [transhumanism](#).

This fusing together of the human body with cutting-edge technologies will see the beginning of the science-fiction dystopian nightmare of having obedient part-human humanoids or androids directing and policing those of us who are still human! This easily surpasses anything that George Orwell predicted could happen when he was writing his novel *1984*. **The evidence is mounting that this is the direction that humanity is now taking—we have been warned! If ever there was a time for human beings to forget their petty political differences, it is now!**

Sadly, however, this hidden cabal has also carefully created and nurtured the Left/Right political spectrum that keeps us artificially divided and distracted. When we see passionate ‘patriots’ and ‘progressives’ chanting obscenities at one another on the streets, if we were to take them quietly to one side and show them the now-undeniable evidence that we are being deliberately corralled into this carefully planned high-tech nightmare of dystopian control, they would unite and drop their opposition and apparent hatred for one another. Why? Because they are first and foremost human beings and they want to protect all children and other innocent people from harm. Like with the rest of us, they are simply motivated by core human values... of which the most important is **love**.

To close, there is no other way of looking at what is happening to the peoples of the world. We are at war with this unelected and unaccountable despotic mind-set and, with transhumanism now so clearly on the horizon, our very survival as human beings is now at stake. We have to win, but you can only win if you have an effective strategy in place that unites all the innocent parties so that our overwhelming numbers can be used to bring an end to this madness. Sadly, no such strategy exists!

So, with this in mind, a group of us, having all undertaken decades of careful and detailed research about what is really happening behind the scenes, including talking to some former high-level insiders, have put together this [Five-Year Strategy](#) that will peacefully expose and stop this [‘UN Agenda 2030’ Trojan Horse](#) and what these corporate sociopaths have got planned for us.

It is a linear, grassroots and Mahatma Gandhi-style strategy that’s free from egos and which has no formal membership, hierarchy or leaders. It simply exposes deliberately

suppressed knowledge whilst at the same time offering people effective things to do at a local and grassroots level that will guarantee that this technocracy cannot ever be rolled out into our local communities. This will quite simply pull the rug from under this evil cabal.

Please will you now send this message and this strategy out far and wide to all of your contacts—this has to go viral if humanity is to have a real chance of winning this war on our essential human values and our ancient freedoms.

Thank you,

The Great Rising team.
