

# HOW DO I GET INVOLVED?

## YOUR LOCAL TO-DO LIST FOR STOPPING TYRANNY

- 1. Increase your own personal knowledge in key areas:** This must include money creation and money supply and how the implementation of [Treasury Sovereign Money](#) would transform everyone's lives for the better. We all need to fully understand UN Agenda 2030; the fragility of our food security; the supreme precedence of Common and Natural Law; and how 'bad science' (5G/6G, trans-humanism, Big Pharma, anthropogenic global warming) must be replaced by 'good science' (Nikola Tesla's 'free energy', natural and energy healing health cures, organic farming). You will find a huge amount of information [here](#) to help you.
- 2. Support 'Council Watch':** Their important [work](#) is becoming increasingly more effective. Please either join an [existing team](#) or set up a new one. In addition, please support this new [initiative](#). These totalitarian 'globalists' cannot win if we derail their 'Net Zero' plans at a very local level by winning over elected decision-makers in a very friendly and constructive way.
- 3. Engage with other political activists to explore common ground:** Show how core human values like love, compassion, service and truth actually unite us. Explain to the competing political parties how the whole Left/Right political spectrum was deliberately set up to keep people ignorant, divided and distracted from those who really hold the power.
- 4. Establish contact with local media and podcasters:** Give them full briefings about what is really happening and how we are heading towards a [Chinese-style technocracy](#) where our ancient freedoms will be removed as we are all locked down into an Orwellian AI high-tech future where 'Big Brother' takes over our daily lives and decides what we can or cannot do.
- 5. Talk to the MP, local politicians and council officials:** In a very friendly and constructive way, they must be made aware of the clear evidence concerning the [UN 2030 Agenda](#) with its deceptive 17 Sustainable Development Goals. The Council must also be made to realise the complete scam that is [Council Tax](#) and how Treasury Sovereign Money would completely remove their funding concerns and pressures.
- 6. Give support to existing relevant campaigns:** Every community has a myriad of campaigning groups on various social, environmental or political issues – set up meetings to explore common ground and how we can all help and support one another.
- 7. Accept speaking engagements with local community and religious groups:** From the local WI to the Quakers, go and give talks on what we all have in common; what it is that makes us human; and what we should all be doing to make life better for everyone.
- 8. Meet the people on the streets:** Set up a weekly stall on the high-street under two banners – one saying 'HUMANITY FIRST!', the other saying 'COUNCIL WATCH'. Create and give out some campaigning/recruitment leaflets (see suggested templates).
- 9. Contact farming groups, farm shops and allotment holders:** Local food security is essential for a strong and resilient community. Bring existing groups together by creating a local food strategy. Encourage a new 'Dig for Victory', or in this case, 'Dig to Stop Tyranny!'
- 10. Have fun!** If we're not laughing and bantering, we're not doing it right. Being really friendly and having a positive demeanour creates a powerful recruiting magnet.
