

## 2026 RESIDENTIAL POOL OPENING

### PLEASE READ THROUGH THESE PAGES BEFORE SCHEDULING YOUR POOL OPENING

You may not think about opening your pool and/or spa until the first sign of Spring, but you'll come to realize our schedule is full by then! Schedule your pool opening now to ensure that we can fit you into our schedule.

Please submit this form or contact us to request your opening week! Occasionally we can do specific days, however this is subject to our pre-existing schedule. Happy swimming and we look forward to a fun summer with you and your pool and/or spa!

Make sure that you have your pool open at least 2 weeks prior to any pool parties or events.

This will ensure that you and your pool are ready!!!

NAME	_____	DATE	_____

### **THINGS WE WILL DO AS PART OF YOUR POOL OPENING**

- \* Remove, power wash and fold pool cover. You must tell us where to stow your cover or we will leave it on your pool deck for you to store.
- \* You may wish to schedule a drain and clean. (we do not drain and clean vinyl/fiberglass pools) If we do, after your pool is cleaned, we will leave it filling. YOU MUST MONITOR THE WATER FILL! When pool is full, contact us to return to start up pool and finish the pool opening. NO TRUCK FILLS
- \* We will install your ladders, handrails, skimmer baskets and other pool deck equipment.
- \* We will DEWINTERIZE pool filter system and start it up. We will leave system to continuously run.
- \* We will test fire your heater. We will leave your heater off but ready.
- \* We will perform an on-site water analysis and perform an initial adjustment.
- \* We will perform necessary minor repairs to get your system running at an extra charge up to \$100.0
- \* We will look over your pool and area and recommend necessary repairs and replacements.

### **THINGS YOU WILL NEED TO DO AFTER YOUR POOL OPENING**

- \* If there is debris on pool floor, vacuum your pool manually before using your automatic cleaner.
- \* Brush the walls, floors and stairs thoroughly.
- \* Check your skimmer baskets, pump baskets and empty often.
- \* Check your filter pressure daily. Backwash/clean filter as needed until water is clear.
- \* Begin your regular chemical regimen IE: install chlorine in feeders, adjust alkalinity, adjust PH, adjust calcium levels and start using your weekly algaecide.
- \* Set your filter system timer or operating system only after your water is clear!
- \* Set your heater at your desired temperature setting.
- \* Set time clock or operating system for your automatic pool cleaner.
- \* Call Huff Pool and Spa if you have any issues performing any of the above items. Please call during the middle of the day to ensure that we have the time to walk you through any issues.
